the natural histories of animals Animal Welfare and Human Values Rod Preece, Lorna Chamberlain, 2010-10-30 As the most populous province in Canada Ontario is a microcosm of the animal welfare issues which beset Western civilization The authors of this book chairman and vice chairman respectively of the Ontario Society for the Prevention of Cruelty to Animals find themselves constantly being made aware of the atrocities committed in the Society's jurisdiction They have been in turn puzzled exasperated and horrified at humanity's cruelty to our fellow sentient beings The issues discussed in this book are the most contentious in animal welfare disputes animal experimentation fur farming and trapping the use of animals for human entertainment and the conditions under which animals are raised for human consumption They are complex issues and should be thought about fairly and seriously The authors standing squarely on the side of the animals suggest community and belonging as concepts through which to understand our relationships to other species They ground their ideas in Wordsworth's primal sympathy and Jung's unconscious identity with the animal realm The philosophy developed in this book embraces common sense and compromise as the surest paths to the goal of animal welfare It requires respect and consideration for other species while acknowledging our primary obligations to our fellow humans **Insides and Outsides** Maxine Sheets-Johnstone, 2016-10-06 This book brings together diverse aspects of animate nature diverse not only in terms of animate nature itself but in terms of areas of study Indeed the book lives up to the word interdisciplinary in its title It brings together diverse academic perspectives within each chapter and across chapters showing in each instance that scientific understandings of animate nature are or can be complementary to philosophical understandings Thus insides and outsides typically viewed as subjective vs objective mind vs body and self vs other are shown to be woven together in complex and subtle ways in the complexities and subtleties of animate life itself There are and ever have been only two essential models of government minority rule of all types labelled oligocracy and regimes in which power is concentrated in the hands of a single individual labelled monarchy Vaunted democracies are in reality either oligocracies or monarchies The present day democracies of Britain and the United States are in reality composite oligocracies made up of several disparate elements Oligocracies are by definition regimes with a high degree of inequality but with variable levels of liberty Oligocracy and inequality are the default features of human society Equality is unattainable except by a radical monarchy like Fidel Castro's Cuba and then only with difficulty and at the expense of liberty and probably of lives as well Equality of opportunity must not be equated with equality Equality of opportunity means an equal opportunity to become unequal Paradoxically however for genuine equality of opportunity to exist there has to be equality which is practically unattainable For genuine freedom of expression to exist there also needs to be equality because the little man standing on his soap box and shouting his lungs out at Speaker's Corner in London's Hyde Park cannot compete with the media moguls which is why genuine freedom of expression is rare Once these truths are recognised it becomes clear that for one state to attempt regime change in a foreign country is likely to be futile **Animal Rights** John M. Kistler, 2000-06-30 Introductions to each chapter

The Importance of Evolution to Understandings of Human Nature Maxine Sheets-Johnstone, 2023-06-19 This interdisciplinary book focuses on Charles Darwin's extensively detailed observations of all forms of animate life across the global world humans included These existential realities of Nature are not commonly recognized in today's world yet they are all of sizable import in impacting both flora and fauna thus in human understandings of the nature of the world and the nature of all forms of animate life Darwin's descriptively anchored observations furthermore tie in directly with Edmund Husserl's phenomenological analyses of experience However different their inquiries and wonder at the world and at human experience their analyses show how descriptive foundations and a concern with origins are integral to both and how methodology and a living dynamics are central to a recognition of the complementarity of biological neurological sciences and phenomenology
