Halperin,2020-03-24 A voyage of exploration to the outer reaches of our inner lives UFOs are a myth says David J Halperin but myths are real The power and fascination of the UFO has nothing to do with space travel or life on other planets It's about us our longings and terrors and especially the greatest terror of all the end of our existence This is a book about UFOs that goes beyond believing in them or debunking them and to a fresh understanding of what they tell us about ourselves as individuals as a culture and as a species In the 1960s Halperin was a teenage UFOlogist convinced that flying saucers were

real and that it was his life's mission to solve their mystery. He would become a professor of religious studies with traditions of heavenly journeys his specialty. With *Intimate Alien* he looks back to explore what UFOs once meant to him as a boy growing up in a home haunted by death and what they still mean for millions believers and deniers alike. From the prehistoric Balkans to the deserts of New Mexico from the biblical visions of Ezekiel to modern abduction encounters *Intimate Alien* traces the hidden story of the UFO. It's a human story from beginning to end no less mysterious and fantastic for its earthliness. A collective cultural dream UFOs transport us to the outer limits of that most alien yet intimate frontier our own inner space.

The Transcendental Temptation Paul Kurtz, 2013-09-10 In this landmark work Paul Kurtz examines the reasons why people accept supernatural and paranormal belief systems in spite of substantial evidence to the contrary. According to Kurtz it is because there is within the human species a deeply rooted tendency toward magical thinking the transcendental temptation which undermines critical judgment and paves the way for willful beliefs. Kurtz explores in detail the three major monotheistic religions Judaism Christianity and Islam finding striking psychological and sociological parallels between these religions the spiritualism of the nineteenth century and the paranormal belief systems of today. This acclaimed and controversial book includes sections on mysticism belief in the afterlife the existence of God reincarnation astrology and ufology. Kurtz concludes by explaining and advocating rational skepticism as an antidote to belief in the transcendental.

Breaking the Time Barrier Jenny Randles, 2005-04-05 IT WAS ONLY A MATTER OF TIME. Once widely considered an impossibility the stuff of science fiction novels time travel may finally be achieved in the twenty first century. In *Breaking the Time Barrier* bestselling author Jenny Randles reveals the nature of recent breakthrough experiments that are turning this fantasy into reality. The race to build the first time machine is a fascinating saga that began about a century ago when scientists such as Marconi and Edison and Einstein carried out research aimed at producing a working time machine. Today physicists are conducting remarkable experiments that involve slowing the passage of information freezing light and breaking the speed of light and thus the time barrier. In the 1960s we had the space race. Today there is a time race involving an underground community of working scientists who are increasingly convinced that a time machine of some sort is finally possible. Here Randles explores the often riveting motives of the people involved in this quest including a host of sincere if sometimes misguided amateurs the consequences for society should time travel become a part of everyday life and what evidence might indicate that it has already become reality. For if time travel is going to happen and some Russian scientists already claim to have achieved it in a lab then its effects may already be apparent.

Consciousness and Evolution James Christodoulides, 2012-08-01 Understanding the nature of consciousness is the key to understanding the whole of reality It is not that mind has emerged from matter but rather that consciousness and matter are dual aspects of a much greater reality Beyond the simplistic notion of duality that is so entrenched in Western philosophies there is a deeper and more profound way to comprehend the nature of our existence We are parts within a wider whole We do not exist as separate beings within the Universe we are parts of the Universe itself The theory outlined in *Consciousness and Evolution* turns orthodox explanations for the evolution of mind upside down It is not matter that has created consciousness but rather it is consciousness that has moulded matter and created intelligent beings like ourselves In order to understand why we are here and to live our lives as fully as we might we must seek to address the issue at the very core of our being the existence of mind itself
