Collected Researches National Physical Laboratory (Great Britain),1920 [Savannah River Plant, Defense Waste Processing Facility](#) ,1982 [Constitutions and the Commons](#) Blake Hudson,2014-03-26 Constitutions and the Commons looks at a critical but little examined issue of the degree to which the federal constitution of a nation contributes toward or limits the ability of the national government to manage its domestic natural resources Furthermore it considers how far the constitution facilitates the binding of constituent states provinces or subnational units to honor the conditions of international environmental treaties While the main focus is on the US there is also detailed coverage of other nations such as Australia Brazil India and Russia After introducing the role of constitutions in establishing the legal framework for environmental management in federal systems the author presents a continuum of constitutionally driven natural resource management scenarios from local to national and then to global governance These sections describe how subnational governance in federal systems may take on the characteristics of a commons with all the attendant tragedies in the absence of sufficient national constitutional authority In turn sufficient national constitutional authority over natural resources also allows these nations to more effectively engage in efforts to manage the global commons as these nations would be unconstrained by subnational units of government during international negotiations It is thus shown that national governments in federal systems are at the center of a constitutional nested governance commons with lower levels of government potentially acting as rational herders on the national commons and national governments potentially acting as

rational herders on the global commons National governments in federal systems are therefore crucial to establishing sustainable management of resources across scales The book concludes by discussing how federal systems without sufficient national constitutional authority over resources may be strengthened by adopting the approach of federal constitutions that facilitate more robust national level inputs into natural resources management facilitating national minimum standards as a form of Fail safe Federalism that subnational governments may supplement with discretion to preserve important values of federalism

Getting to Scale Homi Kharas, Johannes F. Linn, 2013-04-15 Visit any developing country and you will find governments international donors NGOs and corporations involved in a range of innovative activities to address the needs of the poor Only a fraction of those that show promise at a localized level however will ever be replicated expanded and sustained to achieve a transformative impact Learning how to expand the reach of proven interventions so that they help larger numbers of poor people scaling up is a fundamental challenge facing the developing world This book improves our understanding of how scaling up can be achieved and what the international community can do to support the process Remarkably little is understood of how to design scalable projects the impediments to reaching scale or the most appropriate pathways for reaching that goal To answer these questions this book features a series of case studies drawn from both the public and private sectors to demonstrate how the scaling up of services for the world's poor can happen By linking public and private experience the authors argue that successful scaling up will not be achieved by either public or private sector efforts alone Rather it will require both public and private efforts working together This book demonstrates that the challenges to scaling up are complex and various but ultimately surmountable It provides an invaluable resource for development practitioners analysts and students on a topic that remains largely unexplored and poorly understood

High Spatial Resolution Remote Sensing Yuhong He, Qihao Weng, 2018-06-27 High spatial resolution remote sensing is an area of considerable current interest and builds on developments in object based image analysis commercial high resolution satellite sensors and UAVs It captures more details through high and very high resolution images 10 to 100 cm pixel This unprecedented level of detail offers the potential extraction of a range of multi resource management information such as precision farming invasive and endangered

vegetative species delineation forest gap sizes and distribution locations of highly valued habitats or sub canopy topographic information Information extracted in high spatial remote sensing data right after a devastating earthquake can help assess the damage to roads and buildings and aid in emergency planning for contact and evacuation To effectively utilize information contained in high spatial resolution imagery High Spatial Resolution Remote Sensing Data Analysis and Applications addresses some key questions What are the challenges of using new sensors and new platforms What are the cutting edge methods for fine level information extraction from high spatial resolution images How can high spatial resolution data improve the quantification and characterization of physical environmental or human patterns and processes The answers are built in three separate parts 1 data acquisition and preprocessing 2 algorithms and techniques and 3 case studies and applications They discuss the opportunities and challenges of using new sensors and platforms and high spatial resolution remote sensing data and recent developments with a focus on UAVs This work addresses the issues related to high spatial image processing and introduces cutting edge methods summarizes state of the art high spatial resolution applications and demonstrates how high spatial resolution remote sensing can support the extraction of detailed information needed in different systems Using various high spatial resolution data the third part of this book covers a range of unique applications from grasslands to wetlands karst areas and cherry orchard trees

Phase Transitions in the Early Universe: Theory and Observations Héctor J. De Vega, Isaak M. Khalatnikov, Norma G. Sánchez, 2012-12-06 A fundamental profound review of the key issues relating to the early universe and the physical processes that occurred in it The interplay between cosmic microwave background radiation large scale structure and the dark matter problem are stressed with a central focus on the crucial issue of the phase transitions in the early universe and their observable consequences baryon symmetry baryogenesis and cosmological fluctuations There is an interplay between cosmology statistical physics and particle physics in studying these problems both at the theoretical and the experimental observational levels Special contributions are devoted to primordial and astrophysical black holes and to high energy cosmic rays and neutrino astrophysics There is also a special section devoted to the International Space Station and its scientific utilization

Anthropology Of China, The: China As Ethnographic And Theoretical Critique Stephan Feuchtwang, Charlotte Bruckermann, 2016-07-13 Putting China into the context of general anthropology offers novel insights into its history culture and society Studies in the anthropology of China need to look outwards to other anthropological areas while at the same time anthropologists specialised elsewhere cannot afford to ignore contributions from China This book introduces a number of key themes and in each case describes how the anthropology and ethnography of China relates to the surrounding theories and issues The themes chosen include the anthropology of intimacy of morality of food and of feasting as well as the anthropology of civilisation modernity and the state The Anthropology of China covers both long historical perspectives and ethnographies of the twenty first century For the first time ethnographic perspectives on China are contextualised in comparison with general anthropological debates

Readers are invited to engage in and rethink China's place within the wider world making it perfect for professional researchers and teachers of anthropology and Chinese history and society and for advanced undergraduate and graduate study

Stranded Assets and the Environment Ben Caldecott, 2018-05-11 Drawing on the work of leading researchers and practitioners from a range of disciplines including economic geography economics economic history finance law and public policy this edited collection provides a comprehensive assessment of stranded assets and the environment covering the fundamental issues and debates including climate change and societal responses to environmental change as well as its origins and theoretical basis The volume provides much needed clarity as the discourse on stranded assets gathers further momentum In addition to drawing on scholarly contributions there are chapters from practitioners and analysts to provide a range of critical perspectives While chapters have been written as important standalone contributions the book is intended to systematically take the reader through the key dimensions of stranded assets as a topic of research inquiry and practice The work adopts a broad based social science perspective for setting out what stranded assets are why they are relevant and how they might inform the decision making of firms investors policymakers and regulators The topic of stranded assets is inherently multi disciplinary cross sectoral and multi jurisdictional and the volume reflects this diversity This book will be of great relevance to scholars practitioners and policymakers with an interest in include economics business and development studies climate policy and environmental studies in general

The Institutional Economics of Water R. Maria Saleth, Ariel Dinar, 2004-01-01 This publication examines issues of water sector reform and performance from the perspectives of institutional economics and political economic studies The authors develop an alternative quantitative assessment methodology based on the principle of institutional ecology as well as data collected from 127 water experts from 43 countries and regions around the world using a cross country review of recent water sector reforms within an institutional transaction cost framework

Food Processing Operations and Scale-up Kenneth J. Valentas, J. Peter Clark, Leon Levin, 2020-08-11 Intended for students and practitioners who have a basic education in chemical engineering or food science Contains basic information in each area and describes some of the fundamental ideas of processing development and design Examines the food industry structure how it works consumer products

The Ethical Underpinnings of Climate Economics Adrian Walsh, Sade Hormio, Duncan Purves, 2016-10-04 Despite their obvious importance the ethical implications of climate change are often neglected in economic evaluations of mitigation and adaptation policies Economic climate models provide estimates of the value of mitigation benefits provide understanding of the costs of reducing emissions and develop tools for making policy choices under uncertainty They have thus offered theoretical and empirical instruments for the design and implementation of a range of climate policies but the ethical assumptions included in the calculations are usually left unarticulated This book which brings together scholars from both economics and ethical theory explores the interrelation

between climate ethics and economics Examining a wide range of topics including sustainability conceptions of value risk management and the monetization of harm the book will explore the ethical limitations of economic analysis but will not assume that economic theory cannot accommodate the concerns raised The aim in part is to identify ethical shortcomings of economic analysis and to propose solutions Given the on going role of economics in government thinking on mitigation a constructive approach is vital if we are to deal adequately with climate change This volume will be of great interest to students and scholars of environmental ethics economics political science political philosophy and the philosophy of economics
