Olea,Patricia Mateo-Tomás,José Antonio Sánchez-Zapata,2019-07-22 Carrion or dead animal matter is an inherent component of aquatic and terrestrial ecosystems worldwide and is exploited by a wide diversity of organisms from different trophic levels including microbes arthropods and vertebrates Further carrion consumption by scavengers i e scavenging supports key ecosystem functions and services such as recycling nutrients and energy disposing of carcasses and regulating disease spread Yet unlike dead plant matter dead animal decomposition has received little attention in the fields of ecology wildlife conservation and environmental management and as a result the management of carrion for maintaining biodiversity and functional ecosystems has been limited This book addresses the main ecological patterns and processes relating to the generation and consumption of carrion both in terrestrial and aquatic ecosystems It also discusses a number of conservation concerns and associated management issues particularly regarding the increasing role of human mediated carrion in ecosystems Lastly the book outlines future research lines in carrion ecology and management and identifies the major challenges for scavengers and scavenging processes in the Anthropocene **Rewilding European Landscapes** Henrique M. Pereira,Laetitia M. Navarro,2015-05-04 Some European lands have been progressively alleviated of human pressures particularly traditional agriculture in remote areas This book proposes that this land abandonment can be seen as an opportunity to restore natural ecosystems via rewilding We define rewilding as the passive management of

ecological successions having in mind the long term goal of restoring natural ecosystem processes The book aims at introducing the concept of rewilding to scientists students and practitioners The first part presents the theory of rewilding in the European context The second part of the book directly addresses the link between rewilding biodiversity and habitats The third and last part is dedicated to practical aspects of the implementation of rewilding as a land management option We believe that this book will both set the basis for future research on rewilding and help practitioners think about how rewilding can take place in areas under their management
