Renewable Energy Nick Jelley, 2025-10-31 Very Short Introductions Brilliant Sharp Inspiring Energy is vital for a good standard of living and affordable sources of power that do not cause climate change or pollution are crucial Renewable energy is recognised as providing the answer with countries from around the world deciding at COP28 in 2023 to aim to triple the global renewable energy capacity by 2030 for the transition away from fossil fuels to be on track for net zero emissions by 2050 This Very Short Introduction describes the main sources of renewable energy solar PV wind hydropower and biomass their innovative technologies and what each could deliver It also discusses the relatively small contributions expected from tidal wave geothermal and nuclear power and from carbon capture and storage Nick Jelley presents how the variability of solar PV and wind power can be handled in an electricity grid predominantly powered by renewables and discusses recent innovations in batteries and other energy storage technologies Jelley goes on to explain the importance of decarbonising the huge global heat demand by using heat pumps hydrogen from electrolyzers and electricity directly and of changing to electric vehicles which will decarbonise most of transport Electrification of buildings industry and transport for net zero will roughly triple the supply of electricity and this can be met predominantly by solar PV and wind power The learning effect has resulted in a dramatic drop in the price of wind and solar PV power in the last decade making them the cheapest generators of electricity in most parts of the world This could make powering the world by renewables considerably cheaper than continuing to burn fossil fuels Jelley explores the challenges in achieving this notably geopolitical tensions lack of grid infrastructure permitting planning issues the availability of finance in the global South and the vested interests in fossil fuels The Very Short Introduction ends by discussing the actions needed that include strong consistent policies financial initiatives to take advantage of the long term benefits of renewables and good community involvement
