The Trickster Brain Neuroscience Evolution And Narrative:

The Trickster Brain David Williams, 2012-01-01 *The Trickster Brain Neuroscience Evolution and Nature* by David Williams looks at literature from an evolutionary biological and neurological perspective. He uses the Trickster character as he/she appears across cultures to demonstrate how stories reveal universal aspects of the biological mind. Williams brings together science and the humanities demonstrating a critical way of approaching literature that incorporates scientific thought.

Theorizing Music Evolution Miriam Piilonen, 2024 *Theorizing Music Evolution* is a critical examination of ideas about musical origins with emphasis on nineteenth century music evolutionary texts by Charles Darwin and Herbert Spencer. In a ground breaking contribution to music theory and histories of science, author Miriam Piilonen argues for the significance of this Victorian music evolutionism in light of its ties to a recently revitalized subfield of evolutionary musicology. *The Oxford Handbook of Biblical Narrative* Danna Fewell, 2016-06-01 Comprised of contributions from scholars across the globe, *The Oxford Handbook of Biblical Narrative* is a state of the art anthology offering critical treatments of both the Bible's narratives and topics related to the Bible's narrative constructions. The Handbook covers the Bible's narrative literature from Genesis to Revelation providing concise overviews of literary critical scholarship as well as innovative readings of individual narratives informed by a variety of methodological approaches and theoretical frameworks. The volume as a whole combines literary sensitivities with the traditional historical and sociological questions of biblical criticism and puts biblical studies into intentional conversation with other disciplines in the humanities. It reframes biblical literature in a way that highlights its aesthetic characteristics, its ethical and religious appeal, its organic qualities as communal literature, its witness to various forms of social and political negotiation, and its uncanny power to affect readers and hearers across disparate time frames and global communities.

Excavating Stephen King James Arthur Anderson, 2020-10-28 *Excavating Stephen King: A Darwinist Hermeneutic Study of the Fiction* combines approaches from science and literary theory to examine the canon of Stephen King's fiction work in a single critical study. James Arthur Anderson has devised the concept of Darwinist Hermeneutics as a critical tool to combine evolutionary psychology, neuroscience, biology, and literary Darwinism with other more conventional critical theory including structuralism, narratology, semiotics, and linguistic analysis. Using this theory, Anderson examines King's works in terms of archetypes and mythology, human universals, affective emotions, and the organization of story to create maximum suspense. This method brings new insights into King's stories and broader implications for storytelling as a whole.

Subjects of Substance Julian Henneberg, 2020-07-02 Recent U.S. literature has both been informed by and critically engaged with materialist conceptions of selfhood. Over the past decades, disciplines like neuroscience and evolutionary biology have increasingly recast the human self as a malleable construct produced by physiological processes. In a parallel development, literary authors have created their own conceptions of somatic subjectivity in conjunction or contrast with scientific and medical discourses. *Subjects of Substance* examines the forms, functions, and

effects of materialist models of mind in selected memoirs and novels Authors discussed include Michael W Clune Don DeLillo Kay Redfield Jamison Siri Hustvedt Richard Powers Elyn R Saks and David Foster Wallace The Supernatural After the Neuro-Turn Pieter F. Craffert, John R. Baker, Michael J. Winkelman, 2019-09-10 This book takes what is often referred to as the supernatural to be normal natural phenomena that are closely linked to the neurobiology of the human species Reflecting the neurocultural and biocultural perspective the chapters cover phenomena such as out of body experiences ghosts and experiences of spirit entities The contributors consider the supernatural as emerging from innate neurobiological structures and functions and reflecting known neurobiological processes that explain their universality and persistence The Semiotics of Clowns and Clowning Paul Bouissac, 2015-05-28 During the last 300 years circus clowns have emerged as powerful cultural icons This is the first semiotic analysis of the range of make up and costumes through which the clowns performing identities have been established and go on developing It also examines what Bouissac terms micronarratives narrative meanings that clowns generate through their acts dialogues and gestures Putting a repertory of clown performances under the semiotic microscope leads to the conclusion that the performances are all interconnected and come from what might be termed a mythical matrix These micronarratives replicate in context sensitive forms a master narrative whose general theme refers to the emergence of cultures and constraints that they place upon instinctual behaviour From this vantage point each performance can be considered as a ritual which re enacts the primitive violence inherent in all cultures and the temporary resolutions which must be negotiated as the outcome Why do these acts of transgression and re integration then trigger laughter and wonder What kind of mirror does this put up to society In a masterful semiotic analysis Bouissac delves into decades of research to answer these questions Entrancement Ruth Finnegan, 2017-03-23 This study of dreaming death and shared consciousness develops a context that is humanistic comparative and evidence based in its engagement with the work of cultural anthropology ethnomusicology and the study of the imagination It also reaches into current research on consciousness at the interface of neuroscience anthropology sociology musicology computer studies psychology parapsychology literature and cognitive studies in the process of drawing its content from a range of original writing from diverse disciplinary and cultural backgrounds **Popobawa** Katrina Daly Thompson, 2017-02-06 Bravely takes on not the legendary shapeshifting creature spoken about sporadically on the Swahili coast of Tanzania but rather popobawa discourse The Journal of Modern African Studies Since the 1960s people on the islands off the coast of Tanzania have talked about being attacked by a mysterious creature called Popobawa a shapeshifter often described as having an enormous penis Popobawa s recurring attacks have become a popular subject for stories conversation gossip and humor that has spread far beyond East Africa Katrina Daly Thompson shows that talk about Popobawa becomes a tool that Swahili speakers use for various creative purposes such as subverting gender segregation advertising homosexuality or discussing female sexuality By situating Popobawa discourse within the social and cultural world of the Swahili Coast as well as the wider world of global

popular culture Thompson demonstrates that uses of this legend are more diverse and complex than previously thought and provides insight into how women and men communicate in a place where taboo prohibition and restraint remain powerful cultural forces While Popobawa surely belong to one of the most interesting African legends Katrina Daly Thompson instead of asking where the story originated asks about how people talk about this trickster and what these conversations really mean Claudia Boehme University of Trier A well researched and well documented addition to the body of knowledge on local legends and their global manifestations Journal of Folklore Research Thompson's movement between local and global discourses demonstrates the importance of a phenomenon that could otherwise be viewed as exotic ethnographic trivia while her theoretical orientation makes the text as relevant to linguistic anthropologists as to African studies scholars African Studies Review

How Literary Worlds Are Shaped Bo Pettersson, 2016-09-12 Literary studies still lack an extensive comparative analysis of different kinds of literature including ancient and non Western How Literary Worlds Are Shaped A Comparative Poetics of Literary Imagination aims to provide such a study Literature it claims is based on individual and shared human imagination which creates literary worlds that blend the real and the fantastic mimesis and genre often modulated by different kinds of unreliability The main building blocks of literary worlds are their oral visual and written modes and three themes challenge perception and relation They are blended and inflected in different ways by combinations of narratives and figures indirection thwarted aspirations meta usages hypothetical action as well as hierarchies and blends of genres and text types Moreover literary worlds are not only constructed by humans but also shape their lives and reinforce their sense of wonder Finally ten reasons are given in order to show how this comparative view can be of use in literary studies In sum How Literary Worlds Are Shaped is the first study to present a wide ranging and detailed comparative account of the makings of literary worlds

Minding Dolls Lisa Pavlik-Malone, 2019-01-29 This book explores the symbolic relationship between the self and the object Specifically in terms of my objectified being in which the original physical nature of the thing includes its being alive but loses this phenomenological quality in a sense as one's own personal meaning comes to imbue it Here the thing is a living breathing

human being that becomes an intimate manifestation of one's own imagined experience of the doll. Integral to the morphing or shaping of this essentially private experience may be certain cognitively universal substrates such as archetypal patterns as well as idealistic tendencies of that which is desired. Both of these may contribute to the shaping of one's subjective experience of the doll. This book will be of interest to scholars and researchers concerned with how cognition including psychology and the brain, psychology and literature, psychology and art, and philosophy of mind might relate specifically to understanding the subjective experience of the doll.

Wit's End James Geary, 2018-11-13 Entertaining, illuminating and entirely unique, *Wit's End* conveys the power of wit to refresh the mind. Henry Hitchings, *Wall Street Journal*. In this inventive and playful book, Tom Beer, *Newsday*, James Geary explores every facet of wittiness from its role in innovation to why puns are the highest form of wit. Adopting a different style for each chapter from dramatic dialogue to sermon, heroic couplets to a barroom monologue, Geary embodies wit in all its forms. *Wit's End* agilely balances psychology, folktale, visual art, and literary history with lighthearted humor and acute insight, demonstrating that wit and wisdom are really the same thing.

Crows Calling Bruce McConnell, 2025-09-16 *Crows Calling* is a parable of wisdom and kindness. You would be hard pressed to find a more touching and emotionally resonant testament to the exquisite world we inhabit. Paul Hawken, *The New York Times*. Best-selling author of *Carbon*, *The Book of Life*, Earth's animals are fed up with humanity's mindless damage to our common home. Will a young girl and her family heed their call? Ten-year-old Luz sets out on an overnight camping trip accompanied by her spiritual mentor. Peering through a canopy of California redwoods, Luz witnesses a council of animals confronting the menace of climate change. Led by a lustrous and talkative American Crow named Koro, the animals weigh their options. Some like Koro want to collaborate with humans. Others doubt humanity's good intentions. The conversation compels young Luz, innately in tune with the natural world, to fight passionately in its defense. At once a work of fact-based activism and a moving coming-of-age story, *Crows Calling* immerses the reader in a richly drawn family and community who, despite their differences, decide to dedicate their lives to the care of Grandmother Earth. They are not alone. Rather, they are accompanied by a colorful cast of savvy planimals: bears, coyotes, trees, and even chickens with long memories and ancient ways of healing. However, some damage cannot be undone. Natural disasters, public apathy, and greed threaten everything that Luz and her friends are working for. Can the cross-species alliance find unity and resolve the climate crisis?

Neuroleadership James Teboul, Philippe Damier, 2017-09-27 Confront la prise de décision ou au changement, notre cerveau agit souvent en commettant des erreurs ou en produisant des biais cognitifs qui réduisent notre liberté d'action. Parmi ses dysfonctionnements, les plus fréquents : l'aversion naturelle pour la prise de risque et la tendance à rester fixé sur le résultat court terme et le plaisir immédiat, la propension aux généralisations et aux réactions automatiques. Tout comme des sportifs de haut niveau doivent acquiescer à une bonne connaissance de leur corps pour gagner, les managers et les leaders doivent connaître les potentialités et les limites du cerveau humain s'ils veulent mieux anticiper certains de ses modes de fonctionnement.

Truth and Storytelling Emily Edwards, 2022-03-01 The goal of this book is to guide writers toward creating more authenticity in visual storytelling One of the needs for art is the mirror a reflection of human existence and what is glorious tragic wonderful and funny about life In an age of post truth where derivative and grotesquely bogus stories are abundant globally networked and digitally streamed this book examines what it means to both artists and audiences when the mirror is consistently distorted inaccurate and biased The book offers a guide for finding authenticity in fictional narrative regardless of genre or form The book is intended as a compass for writers to better understand and confront the truths they want to reveal through narrative stories and how to find legitimacy in the fictional characters and situations they create One element that sets this book apart from others is the use of storyboarding to explain ideas There are many books that teach fundamentals of writing and producing for the screen promising the reader great success through formula This book is a guide for writers in finding their unique creative voice While the emphasis of this book is on creating scripts intended for production of moving image media the guide can be adapted to the creativity of various types of storytellers working in a variety of media fields

Cultural Memory Donald R. Wehrs, Suzanne Nalbantian, Don M. Tucker, 2022-11-29 Bringing together neuroscientists social scientists and humanities scholars in cross disciplinary exploration of the topic of cultural memory this collection moves from seminal discussions of

the latest findings in neuroscience to variegated specific case studies of social practices and artistic expressions This volume highlights what can be gained from drawing on broad interdisciplinary contexts in pursuing scholarly projects involving cultural memory and associated topics The collection argues that contemporary evolutionary science in conjunction with studies interconnecting cognition affect and emotion as well as research on socially mediated memory provides innovatively interdisciplinary contexts for viewing current work on how cultural and social environments influence gene expression and neural circuitry Building on this foundation Cultural Memory turns to the exploration of the psychological processes and social contexts through which cultural memory is shaped circulated revised and contested It investigates how various modes of cultural expression architecture cuisine poetry film and fiction reconfigure shared conceptualizing patterns and affectively mediated articulations of identity and value Each chapter showcases research from a wide range of fields and presents diverse interdisciplinary contexts for future scholarship As cultural memory is a subject that invites interdisciplinary perspectives and is relevant to studying cultures around the world of every era this collection addresses an international readership comprising scholars from the humanities social sciences and natural sciences from advanced undergraduates to senior researchers
