Bureau of Labor Statistics, 2002-04 Basic Writing in America Nicole Pepinster Greene, Patricia J. McAlexander, 2008 Basic Writing in America published three decades after Mina Shaughnessy's *Errors and Expectations* presents the kind of educational stories envisioned by The City University of New York's Patricia Laurence Each of these stories has its own unique setting conflict and outcome Yet together they give a powerful and dramatic portrait of basic writing in four year colleges and universities across the country In the Introduction the editors argue that basic writing programs involved a new concept of writing remediation Receiving impetus from the American civil rights movement these programs defined postsecondary education not in terms of an investment for society but as an individual right Indeed a major purpose of basic writing was to facilitate the integration of underrepresented groups into America's colleges and universities The chapters describe the often hostile responses to basic writing and its students the low status of basic writing programs within English departments and universities clashes within the basic writing field itself pedagogical developments in composition as applied to basic writing and the professionalization of basic writing faculty They also show as years pass the raising of college admission standards the elimination or downsizing of basic writing programs and the channeling of less

qualified students to two year colleges But in a number of institutions there are also innovations and successes including the emergence of a new type of basic writing program one that is more integrated with the college or university and that offers learning support to a wider range of students The Untied Stats On American William Carroll, Ph. D.,2005-07 People can write the most nonsensical things and now they have computer technology to help them create linguistic lunacies If a hundred chimpanzees were seated at computer keyboards they would have difficulty matching the ridiculous stuff turned out by human hands and minds with the assistance of their reliable smart machines The Untied Stats on American And Other Computer Assisted Writing Errors takes playful yet serious swipes at some of the misleading erroneous and just plain hilarious things that get past careless proofreaders and their trusty spelling checkers Author William Carroll illustrates what can happen to the written word when oblivious proofreaders allow their computers to do their proofreading and editing Caress drivers or maybe even carless ones who believe sex education should be taught in pubic schools even those with Cadillacs on their eyes and symptoms of old timers disease can learn something of value from Carroll s The Untied Stats on American Nonetheless they should all be careful not to wine up laughing they re assets off wile their during it The real intention of this tasty treatise is to make computer users more aware of the critical need for proofreading while keeping their brains in gear Artificial intelligence is no replacement for the human mind the most efficient computer imaginable
