environment but also how sharks came to be considered the most feared creatures in the open oceans as a consequence of this incorporation. Yet sharks are especially important in helping to maintain a balance that is essential to the health of the oceans. The book begins with a treatment of the three sharks at the top of global shark attack files from scientific, economic, and environmental perspectives. Subsequent chapters engage with cultural representations of sharks in poetry, drama, art, novels, screenplay adaptations, and films. Through an exploration of the ways in which sharks have been represented in human culture through the centuries, this book alerts the global community to the importance of sharks as a common cultural heritage. It aims to change perceptions of sharks so that they can become more revered than feared. The authors of this book argue that an increased understanding of sharks should lead to the development of better strategies for shark and human interactions. This book will be of great interest to researchers and students of the Environmental Humanities, Cultural History, and the Arts. It is also excellent supplementary reading for courses in Zoology and Marine Science. **Escape from . . . the**

Ed is sent away from the shore to visit his aunt in Matawan, New Jersey, where he can stay safe and cool. In Matawan, Ed meets Mike Anders, a local boy who knows all the best spots in the nearby creek. Mike vows to teach Ed to swim, and Ed promises to help Mike read better. Little do they know, the new friends are about to have the summer of their lives. Which is extraordinary because where is it getting all those glasses? The natural world is an amazing, compelling and funny place, a place where fact is always more staggering and often funnier than fiction.
