two puzzling features of pain its strong motivating power and its uninformative nature Klein argues that the biological purpose of pain is homeostatic like hunger and thirst pain helps solve a challenge to bodily integrity It does so by motivating you to act in ways that help the body recover If you obey pain s command you get better in ordinary circumstances He develops his account to handle a variety of pain phenomena and applies it to solve a number of historically puzzling cases Klein s intent is to defend the imperativist view in a pure form without requiring pain to represent facts about the world Klein presents a model of imperative content showing that intrinsically motivating sensations are best understood as imperatives and argues that pain belongs to this class He considers the distinction between pain and suffering explains how pain motivates addresses variations among pains and offers an imperativist account of maladaptive pains pains that don t appear to hurt masochism and why pain feels bad *BLENDER - THE ULTIMATE GUIDE - VOLUME 3* Andrea Coppola,
