Phone Therapy Sarah Hart, 2022-12-30 Phone therapy is as relevant as it was 50 years ago. The increased use of this medium during the COVID 19 pandemic and the revision of professional therapy body guidance has endorsed the validity and effectiveness of phone therapy. The book updates, revises and reinvigorates the medium for individual therapists, counselling services and training organisations in a post lockdown world where blended therapy is the norm. It includes practical considerations, phone related theory, personal experience and self reflection exercises. Contributing counsellor vignettes cover topics such as adapting theoretical modalities and EDI considerations without visual cues. From assessments, contracting and core skills to assumptions, disinhibition and privacy issues, it supports therapists and counselling organisations to embrace the accessibility, flexibility and creativity that therapy by phone provides. Relevant for experienced and trainee therapists alike, this book provides practitioners with the support and knowledge to confidently use phone therapy in their practice.

Balance Carol Svec, 2017-09-01 Some low frequency sounds such as noise from storms or truck engines can make you feel dizzy and nauseated. An index finger's light touch can stop people from losing balance. You are more prone to trip when you think someone is watching you. A breakthrough in improving balance as we age might just come through the study of the Achilles tendon. A person gets falling drunk due to a tiny structure in the inner ear that floats when it becomes soaked in alcohol. These and other surprising and useful nuggets of information can be found in this lively 360 degree exploration of our body's most intricate overlooked sense: balance. Readers follow award winning science and health writer Carol Svec through various facilities as she talks with leading scientists doing state of the art balance research. Svec translates their most fascinating findings for the layperson in a way that is highly entertaining and broadly accessible. She showcases the coolest gadgets used by researchers as she grills an egg in a virtual kitchen, has her senses fooled by a mannequin named Hans in a Tumbling Room, survives the Vominator without losing her lunch and experiences drunken dizziness inside a police muster room. Along the way she cites case studies of people whose lives are affected by balance dysfunction, explains how balance research is being applied today to help those who are ill, elderly, disabled or simply prone to motion sickness and provides a glimpse at what ingenious, potentially life changing advances may be coming down the road. Whether you have a balance disorder or care about someone who does, are an athlete or performer whose livelihood depends on balance or just love accessible, page turning popular science, you'll be enlightened and entertained by this appreciation of our complex super sense.

Identified Flying Objects Dr. Michael P. Masters, 2019-03-22 Could UFOs and Aliens simply be us but from the future? This provocative new book cautiously examines the premise that extraterrestrials may instead be our distant human descendants using the anthropological tool of time travel to visit and study us in their own hominin evolutionary past. Dr. Michael P. Masters, a professor of biological anthropology specializing in human evolutionary anatomy, archaeology and biomedicine, explores how the persistence of long term biological and cultural trends in human evolution may ultimately result in us becoming the ones piloting these disc shaped craft which are likely the very devices that allow our future progeny

to venture backward across the landscape of time Moreover these extraterrestrials are ubiquitously described as bipedal large brained hairless human like beings who communicate with us in our own languages and who possess technology advanced beyond but clearly built upon our own These accounts coupled with a thorough understanding of the past and modern human condition point to the continuation of established biological and cultural trends here on Earth long into the distant human future

Trauma-Sensitive Theology Jennifer Baldwin, 2018-09-20 The intention of Trauma Sensitive Theology is to help theologians professors clergy spiritual care givers and therapists speak well of God and faith without further wounding survivors of trauma It explores the nature of traumatic exposure response processing and recovery and its impact on constructive theology and pastoral leadership and care Through the lenses of contemporary traumatology somatics and the Internal Family Systems model of psychotherapy the text offers a framework for seeing trauma and its impact in the lives of individuals communities society and within our own sacred texts It argues that care of traumatic wounding must include all dimensions of the human person including our spiritual practices religious rituals and community participation and theological thinking As such clergy and spiritual care professionals have an important role to play in the recovery of traumatic wounding and fostering of resiliency This book explores how trauma informed congregational leaders can facilitate resiliency and offers one way of thinking theologically in response to traumatizing abuses of relational power and our resources for restoration

Modernist Soundscapes Angela Frattarola, 2018-11-12 This study questions how early twentieth century auditory technologies altered sound perception and how these developments shaped the modernist novel Without polarizing vision and audition this book reveals how modernists tend to use auditory perception to connect characters shifting the subject from a distanced judgmental observer to a reverberating body attuned to the moment

Alien Agency Chris Salter, 2023-10-31 An investigation into what happens in creative practice when the materials of art and research behave and perform in ways beyond the creators intentions In Alien Agency Chris Salter tells three stories of art in the making Salter examines three works in which the materials of art the stuff of the world behave and perform in ways beyond the creator s intent becoming unknown surprising alien Studying these works all three deeply embroiled in and enabled by science and technology allows him to focus on practice through the experiential and affective elements of creation Drawing on extensive ethnographic observation and on his own experience as an artist Salter investigates how researcher creators organize the conditions for these experimental performative assemblages assemblages that sidestep dichotomies between subjects and objects human and nonhuman mind and body knowing and experiencing Salter reports on the sound artists Bruce Odland and Sam Auinger O A and their efforts to capture and then project unnoticed urban sounds tracks the multi year project TEMA Tissue Engineered Muscle Actuators at the art research lab SymbioticA and its construction of a hybrid semi living machine from specially grown mouse muscle cells and describes a research creation project which he himself initiated that uses light vibration sound smell and other sensory stimuli to enable audiences to experience other cultures
