

The background of the cover is a dark, abstract digital graphic. It features numerous glowing circles and rings in various colors, including yellow, orange, blue, and purple. These circles are interconnected by thin, white lines, creating a complex, network-like pattern. Some circles have concentric rings, while others are solid. The overall effect is a sense of dynamic energy and digital connectivity.

Digital Play and

Technologies in the Early Years Christine Stephen, Liz Brooker, Pamela Oberhuemer, Rod Parker-Rees, 2020-04-24

Technologies are a pervasive feature of contemporary life for adults and children. However, young children's experiences with digital technologies are often the subject of polarised debate among parents, educators, policymakers and social commentators, particularly since the advent of tablets and smartphones changed access to the Internet and the nature of interactions with digital resources. Some are opposed to children's engagement with digital resources, concerned that the activities they afford are not developmentally appropriate, limit physical activity and restrict the development of social skills. Others welcome digital technologies which they see as offering new and enhanced ways of learning and sharing knowledge. Despite this level of popular and policy interest in young children's interactions with digital technologies, our understanding of the influence of these technologies on playing and learning and on the role of educators has remained surprisingly limited. The contributions to this book fill in the gaps of our existing understanding of the field. They focus on children and families from Australia to England to Estonia, the how and why of encounters with digital technologies, the nature of digital play and questions about practice and practitioners. The book raises critical questions and offers new understandings and theoretical insights around one of the hot topics in early years research. This book was originally published as a special issue of the *Early Years* journal.

Digital Childhoods Susan J. Danby, Marilyn Fleer, Christina Davidson, Maria Hatzigianni, 2018-04-03 This book highlights the multiple ways that digital technologies are being used in everyday contexts at home and school in communities and across diverse activities from play to web searching to talking to family members who are far away. The book helps readers understand the diverse practices employed as children make connections with digital technologies in their everyday experiences. In addition, the book employs a framework that helps readers easily access major themes at a glance and also showcases the diversity of ideas and theorisations that underpin the respective chapters. In this way, each chapter stands alone in making a specific contribution and at the same time makes explicit its connections to the broader themes of digital technologies in children's everyday lives. The concept of digital childhood presented here goes beyond a sociological reading of the everyday lives of children and their families and reflects the various contexts in which children engage, such as preschools and childcare centres.

Beginning Teaching, Beginning Learning: In Early Years and Primary Education Janet Moyles, Jane Payler, Jan Georgeson, 2017-06-16 This bestselling textbook provides an introduction to the fundamentals of teaching and learning in early years and primary education.
