Contemporary Security Studies Alan Collins, 2022 With unrivalled coverage of a wide range of issues from terrorism nuclear deterrence and the weapons trade to environmental security transnational crime and cyber security **Contemporary Security Studies** is the definitive cutting edge introduction to security studies Bringing together contributions from leading scholars it provides a student friendly guide to traditional and critical theoretical approaches as well as the most important contemporary issues that dominate the modern security field Whether you are exploring how politicians portrayed the Covid19 pandemic as a security issue or the role that popular culture plays in promoting peace a broad variety of real world case studies and examples throughout the text encourage you to question your preconceptions of security studies and to

critically evaluate key approaches and ideas in the subject New to this Edition A new Chapter 13 on popular culture introduces you to this innovative approach to security studies exploring the role that it plays in shaping and understanding security related processes A revised Chapter 12 on securitization theory traces its emergence and evolution as a framework for analysis covering everything you need to know about its main concepts and criticisms Chapter 27 on transnational crime now includes coverage of the crime terror nexus the relationship between organized crime and the state and a case study focusing on Mexico Every chapter has been thoroughly updated to reflect current political issues and developments in world affairs such as the initial impact of the Covid 19 pandemic climate change and forced migration Book jacket Modern War and the Utility of Force Isabelle Duyvesteyn, Jan Angstrom, 2010-04-05 This book investigates the use and utility of military force in modern war After the Cold War Western armed forces have increasingly been called upon to intervene in internal conflicts in the former Third World These forces have been called upon to carry out missions that they traditionally have not been trained and equipped for in environments that they often have not been prepared for A number of these new types of operations in allegedly new wars stand out such as peace enforcement state building counter insurgency humanitarian aid and not the least counter terrorism The success rate of these missions has however been mixed providing fuel for an increasingly loud debate on the utility of force in modern war This edited volume poses as its central question what is in fact the utility of force Is force useful for anything other than a complete conventional defeat of a regular opponent who is confronted in the open field This book will be of much interest to students of strategic studies war and conflict studies counter insurgency security studies and IR Isabelle Duyvesteyn is an Associate Professor at the Department of History of International Relations Utrecht University in the Netherlands Jan Angstrom is a researcher at the Swedish National Defence College War, Torture and Terrorism Anthony F. Lang, Jr., Amanda Russell Beattie, 2008-10-27 This book seeks to demonstrate how rules not only guide a variety of practices within international politics but also contribute to the chaos and tension on the part of agents in light of the structures they sustain Four central themes practice legitimacy regulation and responsibility reflect different dimensions of a rule governed political order The volume does not provide a single new set of rules for governing an increasingly chaotic international system Instead it provides reflections upon the way in which rules can and cannot deal with practices of violence While many assume that obeying the rules will bring more peaceful outcomes the chapters in this volume demonstrate that this may occur in some cases but more often than not the very nature of a rule governed order will create tensions and stresses that require a constant attention to underlying political dynamics This wide ranging volume will be of great interest to students of International Law International Security and IR theory

Contemporary Military Theory Jan Angstrom, J.J. Widen, 2014-07-17 The book aims to provide the reader with a state of the art introduction to classic and modern military theory The text accounts for the most important theories within the field by developing and analyzing these theories as well as problematizing both their normative and explanatory aims While

focusing on military theory the book does not only reflect a single way of relating to knowledge of war and warfare but furthers learning by introducing contrasting perspectives as well as constantly criticizing the theories There is a clear need for an introductory text for the entire field of military theory that focuses whole heartedly on the theories not on their context or how they are expressed in practice during war This book covers such questions as how we should understand the changing character of war the utility of force and how the pursuit of political ends is achieved through military means It draws upon and illustrates military thought through a wide ranging number of examples from the Napoleonic Wars to the current war in Afghanistan This book will be of great interest for students of military theory strategic studies security studies and defence studies

War Transformed Mick Ryan, 2022-02-15 War Transformed The Future of Twenty First Century Great Power Competition and Conflict provides insights for those involved in the design of military strategy and the forces that must execute that strategy Emphasizing the impacts of technology new era strategic competition demography and climate change Mick Ryan uses historical as well as contemporary anecdotes throughout the book to highlight key challenges faced by nations in a new era of great power rivalry Just as previous industrial revolutions have advanced societies the nascent fourth industrial revolution will have a similar impact on how humans fight compete and build military power in the twenty first century After reviewing the principle catalysts of change in the security environment War Transformed seeks to provide a preview of the shape of war and competition in the twenty first century Ryan examines both the shifting character of war and its enduring nature In doing so he proposes important trends in warfare that will shape all aspects of human competition and conflict in the coming decades The remainder of the book analyzes how military institutions must prepare for future competition and conflict Competing and engaging in combat in this new era involves new and evolved strategies and warfighting concepts as well as adapting our current military organizations It will also demand building an intellectual edge in military personnel through evolved concepts of training education and development As the competitive environment and potential battlefields continue to change conceptions of combat competition and conflict must also evolve Mick Ryan makes the case for transforming how Western military institutions view war in this century

Reconstructing Afghanistan William Maley, Susanne Schmeidl, 2014-11-27 This book identifies some of the main lessons for civil military interactions that can be derived from the experiences of Provincial Reconstruction Teams PRTs in Afghanistan The book has three main themes Firstly the volume analyses why the ways in which civil and military actors interact in theatres of operations such as Afghanistan matter for both those categories of actors and for the ordinary people who their interactions serve Second the book highlights that these interactions are invariably complex The third theme which arises specifically from the PRT experience in Afghanistan is that such teams vary significantly in their roles resourcing and operational environments Consequently to appraise the value of the PRT experience it is necessary to unpack the experiences of different PRTs which the use of case studies allows one to do The volume comprises an introduction identifying some key questions to which the

PRT experience gives rise and case studies of the experiences of the United States United Kingdom New Zealand Canada The Netherlands Australia Germany and France chapters dealing with the roles played by NGOs and the UN system and a discussion from an Afghan perspective of the implications of civilian casualties It is the combination of the diverse cases discussed in this book with a focus on the broad challenges of optimising civil military interactions that makes this book distinctive This book will be of much interest to students of the Afghan War civil military relations statebuilding Central Asian politics and IR in general

US Hegemony and International Legitimacy Lavina Rajendram Lee, 2010-02-05 This book examines US hegemony and international legitimacy in the post Cold War era focusing on its leadership in the two wars on Iraq The preference for unilateral action in foreign policy under the Bush Administration culminating in the use of force against Iraq in 2003 has unquestionably created a crisis in the legitimacy of US global leadership Of central concern is the ability of the United States to act without regard for the values and interests of its allies or for international law on the use of force raising the question does international legitimacy truly matter in an international system dominated by a lone superpower US Hegemony and International Legitimacy explores the relationship between international legitimacy and hegemonic power through an in depth examination of two case studies the Gulf Crisis of 1990 91 and the Iraq Crisis of 2002 03 and examines the extent to which normative beliefs about legitimate behaviour influenced the decisions of states to follow or reject US leadership The findings of the book demonstrate that subordinate states play a crucial role in consenting to US leadership and endorsing it as legitimate and have a significant impact on the ability of a hegemonic state to maintain order with least cost Understanding of the importance of legitimacy will be vital to any attempt to rehabilitate the global leadership credentials of the United States under the Obama Administration This book will be of much interest to students of US foreign policy IR theory and security studies Lavina Rajendram Lee is a lecturer in the Department of Modern History Politics and International Relations at Macquarie University Australia and has a PhD in International Relations from the University of Sydney
