Music Education, Ecopolitical Professionalism, and Public Pedagogy Margaret S. Barrett, Heidi M. Westerlund, 2024-01-01 This book challenges the dominant expertise professionalism rationale for music education by responding to the call to develop ecological awareness at a time when all professions have a moral obligation to place sustainable and interdependent life at the center The book aims to expand music education's professional horizons to acknowledge the responsibility of the music field to contribute to the demands of complex questions of sustainability and identify the ways in which sustainable music education may be strengthened through an activist relational ecological stance It suggests a radical moral turn by asking What if music education is recognised as part of the problem of sustaining unsustainability and What if music teacher education was developed in and through dialogue with a futures perspective These questions are interrogated through a critical analysis of the historical positioning of music in education and an interdisciplinary application of theories of ecology and professionalism

*Interactive Media for Sustainability* Roy Bendor, 2018-08-02 Interactive Media for Sustainability presents a conceptually rich critical account of the design and use of interactive technologies to engage the public with sustainability Treating interactive technologies as forms of mediation the book argues that these technologies advance multiple understandings of sustainability At stake are the ways sustainability encodes the complexity of interrelated social and natural systems and how it conveys the malleability of the future The book's argument is anchored in a diverse set of theoretical resources that include contemporary work in human computer interaction HCI social theory media studies and the philosophy of technology and is animated by a variety of examples including interactive simulations persuasive apps digital games art installations and decision support tools

Transforming Food Systems Molly D. Anderson, 2024-07-04 This book focuses on the contested nature and competing narratives of food system transformations despite it being widely acknowledged that changes are essential for the safeguarding of human and planetary health and well being The book approaches food system transformation through narratives or the stories we tell ourselves and others about how things work Narratives are closely connected with theories

of change although food system actors frequently lack explicit theories of change Using political economy and systems approaches to analyze food system transformation the author focuses on how power in food systems manifests and how this affects whom can obtain healthy and culturally appropriate food on a reliable basis Among the narratives covered are agroecology food sovereignty and technological innovation The book draws on interviews and recorded speeches by a broad range of stakeholders including international policymakers philanthropists academics and researchers workers in the food and agricultural industries and activists working for NGOs and social movements In doing so it presents contrasting narratives and their implicit or explicit theories of change This approach is vitally important as decisions made by policymakers over the next few years based on competing narratives will have a major influence on who will eat what how food will be produced and who will have a voice is shaping food systems The overarching contribution of this book is to point toward the most promising pathways for achieving sustainable food systems and refute pathways that show little hope of achieving a more sustainable future This book will be of great interest to students scholars and policymakers interested in creating a sustainable food system which will ensure a food secure socially just and environmentally sustainable future
