PROCEEDINGS OF THE 2nd INTERNATIONAL CONFERENCE ON QUANTITATIVE, SOCIAL, BIOMEDICAL & ECONOMIC ISSUES 2018 Christos C. Frangos,2018-03-02 This year s Conference is organized by the Greek Foundation for Research in the Quantitative Social and Economic Subjects which is a non profit Company with Articles of Association registered in the Chamber of Non for profit organizations This Conference is a continuation in a broader sense of the four International Conferences which were organized by myself during the years 2003 2009 2013 and 2015 under the auspices of the Technological Educational Institute of Athens and of the 1st International Conference on Quantitative Social Biomedical and Economic Issues June 29 30 2017 Athens organized under the Auspices of the Greek Foundation for Research in the Quantitative Social and Economic Subjects

This Conference is focusing on the Emerging New Technologies in every Sector Financial Social Biomedical Humanitarian Educational and Economic the influence which they exercise on Management Education Economy Information and Communication Medicine Outer Space Research and the dangers and complications in people s behavior generated from the uncontrollable use of the New Technologies *Supply Chain Risk* Clare Brindley,2017-07-05 The impact of technological change globalization information and communication technologies and international governmental intervention has radically altered supply chain strategies operations and risk profiles for most organizations The challenge facing business and researchers alike is how best to address risk management in this new context This collection written by international scholars from the UK US and Scandinavia addresses this need by providing the first topical review of these developments and the latest research findings The findings represent a robust cross disciplinary view of supply chains articulating policies and strategies for organizations The research studies are based on empirical case studies within services and manufacturing in both large and SME organizations This work is intended to provide the foundation for future research in this expanding area and the impact it has on managing risk within the supply chain *Media Firms* Robert G. Picard,2014-04-04 Media Firms presents studies applying the company level approach to media and communication firms It explores differences among missions strategies organizational choices and other business decisions Reviewing economic factors and pressures on media and communications companies this book seeks to improve understanding of how these elements affect market and company structures operations and performance of firms The chapters written by leading scholars worldwide were selected from papers on the theme of media firms presented at the 5th World Media Economics Conference hosted by the Turku School of Economics and Business Administration and The Journal of Media Economics The collected studies provide an overview of economic and related managerial issues affecting the structures of markets in which firms compete the operations of media and communications firms and their financial performance As a result it expands the discussion of economic issues traditionally associated with the field due to narrowed focus of initial books in media economics It is hoped that this book will induce additional avenues of inquiry regarding such issues **Test and Design-for-Testability in Mixed-Signal**

Integrated Circuits Jose Luis Huertas Díaz,2010-02-23 Test and Design for Testability in Mixed Signal Integrated Circuits deals with test and design for test of analog and mixed signal integrated circuits Especially in System on Chip SoC where different technologies are intertwined analog digital sensors RF test is becoming a true bottleneck of present and future IC projects Linking design and test in these heterogeneous systems will have a tremendous impact in terms of test time cost and proficiency Although it is recognized as a key issue for developing complex ICs there is still a lack of structured references presenting the major topics in this area The aim of this book is to present basic concepts and new ideas in a manner understandable for both professionals and students Since this is an active research field a comprehensive state of the art overview is very valuable introducing the main problems as well as the ways of solution that seem promising emphasizing

their basis strengths and weaknesses In essence several topics are presented in detail First of all techniques for the efficient use of DSP based test and CAD test tools Standardization is another topic considered in the book with focus on the IEEE 1149 4 Also addressed in depth is the connecting design and test by means of using high level behavioural description techniques specific examples are given Another issue is related to test techniques for well defined classes of integrated blocks like data converters and phase locked loops Besides these specification driven testing techniques fault driven approaches are described as they offer potential solutions which are more similar to digital test methods Finally in Design for Testability and Built In Self Test two other concepts that were taken from digital design are introduced in an analog context and illustrated for the case of integrated filters In summary the purpose of this book is to provide a glimpse on recent research results in the area of testing mixed signal integrated circuits specifically in the topics mentioned above Much of the work reported herein has been performed within cooperative European Research Projects in which the authors of the different chapters have actively collaborated It is a representative snapshot of the current state of the art in this emergent field
