Transcendence The Disinformation Encyclopedia Of Transhumanism And The Singularity:

Transcendence R. U. Sirius, Jay Cornell, 2015 Transhumanism is an international movement that advocates the use of science and technology to overcome the natural limitations experienced by humanity through such developments as the Singularity the creation of machine intelligences that exceed the capacities of our biological brains the ability to replicate individual minds and put them into solidstate bodies or virtual environments individual control over mental and emotional states for enhancing functionalities and or ecstasies Some of this is happening now Some of it is still in the minds of dreamers In nearly ninety AZ entries Transcendence provides a multilayered look at the accelerating advances in artificial intelligence cognitive science genomics information technology nanotechnology neuroscience space exploration synthetic biology robotics and virtual worlds that are making transhumanism a reality Entries range from Cloning and Cyborg Feminism to Designer Babies and MemoryEditing Drugs In addition the book notes historical predecessors and personalities both in mythology and history ranging from Timothy Leary to Michael Jackson to Ray Kurzweil It also introduces the culture around Transhumanism covering all the geeky obsessions of the Transhumanist movement **Virtual Immortality - God, Evolution, and the Singularity in Post- and Transhumanism** Oliver Krüger, 2021-10-01 In recent years ideas of post and transhumanism have been popularized by novels TV series and Hollywood movies According to this radical perspective humankind and all biological life have become obsolete Traditional forms of life are inefficient at processing information and inept at crossing the high frontier outer space While humankind can expect to be replaced by their own artificial progeny posthumanists assume that they will become an immortal part of a transcendent superintelligence Krüger's award winning study examines the historical and philosophical context of these futuristic promises by Ray Kurzweil Nick Bostrom Frank Tipler and other posthumanist thinkers *Tales of the Turing Church: Hacking religion, enlightening science, awakening technology* Giulio Prisco, 2020-02-07 This book explores intersections of science and religion spirituality and technology engineering and science fiction mind and matter and outlines a new cosmic transhumanist religion Hacking religion enlightening science awakening technology **The Ethics of Superintelligent Design** Paul Golata, 2018-03-07 Artificial intelligence AI permeates Google searches the personal assistants in our smartphones and is all over our newsfeeds Watson's machine learning has already started to revolutionize many important industries including oncology law finance and entertainment The idea that man is about to increase his immediate surroundings with exponential gains in the level of intelligence over the coming generations is based upon a technological revolution and the potential for artificial superintelligence ASI It is within this context that there is a prevailing need for a discussion of its ethical implications As a Christian ethicist Paul Golata believes that the need for this conversation to be informed by Christian principles is imperative ASI is a move toward the proper handling of information However how a society interprets and applies this information is actually more pertinent than the raw amount of information it possesses This important ethical conversation is being led by

humanistic thinkers who assume that all of reality is just matter in motion and that mind is nothing more than electrochemical activity in the wetware of human brains The Ethics of Superintelligent Design critically examines and challenges some of the most important trajectories of ASI while upholding the authority and inerrancy of the Bible the supernatural creation account a realistic view of the state of humanity and biblical ethics **Religion and Human**

Enhancement Tracy J. Trothen, Calvin Mercer, 2017-09-17 This collection vigorously addresses the religious implications of extreme human enhancement technology Topics covered include cutting edge themes such as moral enhancement common ground to both transhumanism and religion the meaning of death desire and transcendence and virtue ethics Radical enhancement programs advocated by transhumanists could arguably have a more profound impact than any other development in human history Reflecting a range of opinion about the desirability of extreme enhancement leading scholars in the field join with emerging scholars to foster enhanced conversation on these topics **Black Transhuman Liberation**

Theology Philip Butler, 2019-12-12 Mediating Black religious studies spirituality studies and liberation theology Philip Butler explores what might happen if Black people in the United States merged technology and spirituality in their fight towards materializing liberating realities The discussions shaping what it means for humans to exist with technology and as part of technology are already underway transhumanism suggests that any use of technology to augment intellectual psychological or physical capability makes one transhuman In an attempt to encourage Black people in the United States to become technological progenitors as a spiritual act Butler asks whether anyone has ever been just human Butler then explores the implications of this question and its link to viewing the body as technology Re imagining incarnation as a relationship between vitality biochemistry and genetics the book also takes a critical scientific approach to understanding the biological embodiment of Black spiritual practices It shows how current and emerging technologies might align with the generative biological states of Black spiritualities in order to concretely disrupt and dismantle oppressive societal structures

Theologically Engaged Anthropology J. Derrick Lemons, 2018-08-16 After years of discussion within the field of anthropology concerning how to properly engage with theology a growing number of anthropologists now want to engage with theology as a counterpart in ethnographic dialogue Theologically Engaged Anthropology focuses on the theological history of anthropology illuminating deeply held theological assumptions that humans make about the nature of reality and illustrating how these theological assumptions manifest themselves in society This volume brings together leading anthropologists and theologians to consider what theology can contribute to cultural anthropology and ethnography It provides anthropologists and theologians with a rationale and framework for using theology in anthropological research

Understanding Nonverbal Communication Marcel Danesi, 2021-09-09 The human body is a primary source of meaning making with the body conveying over two thirds of our messages But how can we understand these physical communicative cues How are they being expressed and exploited in new media and multimodal online and mobile interaction Offering an in

depth guide to help you investigate and understand real and virtual nonverbal communication using semiotic theory this book assumes little previous knowledge of semiotics or linguistics With in depth comparative case studies each chapter deals with a traditional aspect of nonverbal communication such as facial expressions touch and gesture before extending the discussion to new media and cyberspace Explaining the issues step by step and supported by exercises directed further reading and a glossary of key terms Understanding Nonverbal Communication provides you with all the tools you need to understand how nonverbal communication unfolds in all kinds of contexts and the kinds of messages that it makes possible

Identity, Institutions and Governance in an AI World Peter Bloom,2020-01-10 The 21st century is on the verge of a possible total economic and political revolution Technological advances in robotics computing and digital communications have the potential to completely transform how people live and work Even more radically humans will soon be interacting with artificial intelligence A I as a normal and essential part of their daily existence What is needed now more than ever is to rethink social relations to meet the challenges of this soon to arrive smart world This book proposes an original theory of trans human relations for this coming future Drawing on insights from organisational studies critical theory psychology and futurism it will chart for readers the coming changes to identity institutions and governance in a world populated by intelligent human and non human actors alike It will be characterised by a fresh emphasis on infusing programming with values of social justice protecting the rights and views of all forms of consciousness and creating the structures and practices necessary for encouraging a culture of mutual intelligent design To do so means moving beyond our anthropocentric worldview of today and expanding our assumptions about the state of tomorrow s politics institutions laws and even everyday existence Critically such a profound shift demands transcending humanist paradigms of a world created for and by humans and instead opening ourselves to a new reality where non human intelligence and cyborgs are increasingly central

Exploring Religious Dimensions in AI and Humanity Aristarchos-Vasileios Gkrekas, Nicholas Kokkinos, 2024-07-17 Exploring Religious Dimensions in A I and Humanity explores how the phenomenal advancements of artificial intelligence can reshape our spiritual journeys and influence established ethical frameworks Very Reverend Dr Aristarchos Gkrekas offers insights grounded in deep religious understanding Nicholas Kokkinos provides insightful analyses of the ethical implications of emerging technologies and the potential for AI to serve as a dynamic repository of religious knowledge Through years of collaboration both authors sought a common approach to navigate the exponential growth of technology and its impact on humanity s enduring questions about consciousness ethics and spirituality This book is an essential read for those intrigued by the evolving dialogue between technology and spirituality and is enriched by references to centuries old texts It promises to ignite curiosity and spark a deeper understanding of our digital age s spiritual dimensions and the ethical questions that arise from these phenomenal developments

Science Fiction beyond Borders Shawn Edrei, Danielle Gurevitch, 2016-12-14 Since the turn of the previous century science fiction and its native tropes have been used by authors artists filmmakers and critics in order to challenge boundaries whether these be conceptual literary or metaphorical Uniquely inherent to the genre is its ability to explore as a form of thought experiment different ways of crossing and subverting borders previously thought to be inviolable these transgressions and their effects on popular culture have in turn led to an increased presence of science fiction studies

in academia This volume features papers presented at the 2014 and 2015 Science Fiction Symposia held at Tel Aviv University These essays submitted by an eclectic mix of scholars from different disciplines institutes and walks of life demonstrate the diversity and adaptability of science fiction as a tool for asking and answering impossible questions

Machines for Making Gods Jon Bialecki, 2022-03-01 The Mormon faith may seem so different from aspirations to transcend the human through technological means that it is hard to imagine how these two concerns could even exist alongside one another let alone serve together as the joint impetus for a social movement *Machines for Making Gods* investigates the tensions between science and religion through which an imaginative group of young Mormons and ex Mormons have found new ways of understanding the world The Mormon Transhumanist Association MTA believes that God intended humanity to achieve Mormonism's promise of theosis through imminent technological advances Drawing on a nineteenth century Mormon tradition of religious speculation to reimagine Mormon eschatological hopes as near future technological possibilities they envision such current and possible advances as cryonic preservation computer simulation and quantum archeology as paving the way for the resurrection of the dead the creation of worlds without end and promise of undergoing theosis of becoming a god Addressing the role of speculation in the anthropology of religion *Machines for Making Gods* undoes debates about secular transhumanism's relation to religion by highlighting the differences an explicitly religious transhumanism makes Charting the conflicts and resonances between secular transhumanism and Mormonism Bialecki shows how religious speculation has opened up imaginative horizons to give birth to new forms of Mormonism including a particular progressive branch of the faith and even such formations as queer polygamy The book also reveals how the MTA's speculative account of God and technology together has helped to forestall some of the social pressure that comes with apostasy in much of the Mormon Intermountain West A fascinating ethnography of a group with much to say about crucial junctures of modern culture *Machines for Making Gods* illustrates how the scientific imagination can be better understood when viewed through anthropological accounts of myth
