Transfer Pricing Developments Around the World 2019 Michael Lang, Raffaele Petruzzi, Alfred Storck, 2019-08-09. Intensive work on transfer pricing, one of the most relevant and challenging topics in the international tax environment, continues to increase worldwide at every level of government and international policy, with far reaching impact on countries' legislations, administrative guidelines and jurisprudence. This book presents an in depth issue by issue analysis of the current state of developments along with suggestions for future solutions to the problems raised. Emerging from the research conducted by the WU Transfer Pricing Center at the Institute for Austrian and International Tax Law at WU Vienna University of Economics and Business, this book offers eight topic based papers prepared by international experts on transfer pricing. Greatly helping to define recent transfer pricing issues around the world, this book encompasses the following topics: Global Transfer Pricing Developments, Transfer Pricing Developments in the European Union, Transfer Pricing Developments in the United States, Transfer Pricing Developments in Developing Countries and Emerging Economies, Recent Developments on Transfer Pricing and Intra Group Services, Recent Developments on Transfer Pricing and Intra Group Financing, Recent Developments on the Nexus Rules to Tax Business Profits at Source and Recent Developments on Attribution of Profits to Digital Permanent Establishments. The intense work of international organizations such as the Organisation for Economic Co-operation and Development, United Nations and other international organizations as well as the intense work of the European Union is thoroughly analyzed in this book. The detailed analysis will be of immeasurable value to the various players including international organizations, the business community and advisory firms, corporate CEOs and CFOs and government officials as well as to tax lawyers in house counsel and academics in facilitating efficient dialogue and a coordinated approach to transfer pricing in the future.

Corporate Income Taxes under Pressure Ruud A. de Mooij, Mr. Alexander D Klemm, Ms. Victoria J Perry, 2021-02-26. The book describes the difficulties of the current international corporate income tax system. It starts by describing its origins and how changes such as the development of multinational enterprises and digitalization have created fundamental problems not foreseen at its inception. These include tax competition as governments try to attract tax bases through low tax rates or incentives and profit shifting as companies avoid tax by reporting profits in jurisdictions with lower tax rates. The book then discusses solutions including both evolutionary changes to the current system and fundamental reform options. It covers both reform efforts already under way, for example under the Inclusive Framework at the OECD, and potential radical reform ideas developed by academics.
