Philosophy in a Technological World James Tartaglia,2020-10-15 Philosophy has come to seem like a specialist interest with little or no influence on our lives On the contrary argues James Tartaglia it was the philosophy of materialism which taught us to turn from the gods to seek practical assistance from the titans thereby reversing the moral of an ancient Greek myth to inspire the building of today s technological world As the largely unreflected belief system it has now become materialism continues to steer the direction of technological development while making us think this direction is inevitable By drawing on neglected idealist

traditions of philosophy Tartaglia argues for a new way of looking at reality which asserts our freedom to choose reaffirms and builds upon our ordinary everyday understanding and motivates us to convert technological innovation into a process driven by public rationality and consent With discussions ranging from consciousness determinism and personal identity to post truth culture ego death and video games this clear and accessible book will be of wide interest *Philosophy in Schools* Felicity Haynes,2017-10-02 In 1972 Matthew Lipman founded the Institute of Advancement for Philosophy for Children IAPC producing a series of novels and teaching manuals promoting philosophical inquiry at all levels of schooling The programme consisted of stories about children discussing traditional topics of ethics values logic reality perception and politics as they related to their own daily experiences Philosophy for Children has been adapted beyond the IAPC texts but the process remains one of an open community of inquiry in which teachers promote respect conceptual clarity critical judgement and active listening without imposing their own ideas *Philosophy in Schools* describes the successes and difficulties in implementing this community of inquiry model The book covers topics including the formation of non didactic courses in ethics the difficulties of fitting a post compulsory philosophy course into a standard curriculum framework and the political assumptions of adopting this model in a low socio economic school The contributions also ask deeper questions about how a genuine community of inquiry model is incompatible with conventional models of schooling with their positioning of the discipline of philosophy in the curriculum This book was originally published as a special issue of *Educational Philosophy and Theory* *Philosophy Behind Bars* Kirstine Szifris,2021-07-16 Male prisons can be dangerous places with a climate of distrust but can long term prisoners be given the space to reflect and grow This ground breaking study found that engaging prisoners in philosophy education enabled them to think about some of the big questions in life and as a result to see themselves and others differently *The Philosophy and Practice of Outstanding Early Years Provision* Pat Beckley,2018-06-14 This book examines the philosophical and theoretical foundations of early years practice and supports practitioners as they reflect on the collective and personal rationales which motivate and inform their work with young children Theoretical underpinnings are explored from a variety of perspectives and are translated into effective strategies for application in a range of early years settings Featuring contributions from leading early years professionals *The Philosophy and Practice of Outstanding Early Years Provision* draws on sound expertise to deepen the reader s understanding of the concepts and ideas behind everyday practice The book is divided into four easily navigated sections which explore key issues including the creation of enabling environments leadership in the early years the opportunities and challenges presented by diversity and the value of creative approaches Recommended strategies are discussed in relation to emerging global pressures and the needs of the contemporary child inviting practitioners to modify and enhance future behaviour and practice This will be essential reading for students and practitioners who wish to improve current and future practice by gaining insight into the philosophical foundations which underpin outstanding provision *The Pedagogy of the Community*
