companies encounters resistance on the ground Land Dispossession and Everyday Politics in Rural Eastern India analyses the movement by Singur s so called unwilling farmers to retain and reclaim their farmland By foregrounding the everyday politics of popular mobilization the book sheds new light on the movement s internal politics as well as on contentious issues rooted in everyday caste class and gender relations The Politics of Inequality David Pettinicchio,2021-07-19 For its breadth and depth of research this volume of Research in Political Sociology is essential reading for researchers and students of Politics Sociology and Policy *Food Sovereignty in International Context* Amy Trauger,2015-02-11 Food sovereignty is an emerging discourse of empowerment and autonomy in the food system with the development of associated practices in rural and some urban spaces While literature on food sovereignty has proliferated since the first usage of the term in 1996 at the Rome Food Summit most has been descriptive rather than explanatory in nature and often confuses food sovereignty with other movements and objectives such as alternative food networks food justice or food self sufficiency This book is a collection of empirically rich and theoretically engaged papers across a broad geographical spectrum reflecting on what constitutes the politics and practices of food sovereignty They contribute to a theoretical gap in the food sovereignty literature as well as a relative shortage of empirical work on food sovereignty in the global North much previous work having focussed on Latin America Specific case studies are included from Canada Norway Switzerland southern Europe UK and USA as well as Africa India and Ecuador The book presents new research on the emergence of food sovereignties It offers a wide variety of empirical examples and a theoretically engaged framework for explaining the aims of actors and organizations working toward autonomy and democracy in the food system Global Land Grabs Marc Edelman,Carlos Oya,Saturnino M. Borras Jr.,2016-03-22 Since the 2008 world food crisis a surge of land grabbing swept Africa Asia and Latin America and even some regions of Europe and North America Investors have uprooted rural communities for massive agricultural biofuels mining industrial and urbanisation projects Water grabbing and green grabbing have further exacerbated social tensions Early analyses of land grabbing focused on foreign actors the biofuels boom and Africa and pointed to catastrophic consequences for the rural poor Subsequently scholars carried out local case studies in diverse world regions The contributors to this volume advance the discussion to a new stage critically scrutinizing alarmist claims of the first wave of research probing the historical antecedents of today s land grabbing examining large scale land acquisitions in light of international human rights and investment law and considering anew longstanding questions in agrarian political economy about forms of dispossession and accumulation and grassroots resistance Readers of this collection will learn about the impacts of land and water grabbing the relevance of key theorists including Marx Polanyi and Harvey the realities of China s involvement in Africa how contemporary land grabbing differs from earlier plantation agriculture and how social movements and rural people in general are responding to this new threat This book was published as a special issue of Third World Quarterly **People Power** Howard Clark,2009-08-20 Across the world nonviolent movements are at the forefront of

resistance against repression imperial aggression and corporate abuse However it is often difficult for activists in other countries to know how best to assist such movements The contributors to People Power place nonviolent struggles in an international context where solidarity can play a crucial role Yet they also warn that good intentions are not enough solidarity has to listen to local movements Examining movements from Zimbabwe to Burma and Palestine the contributors assess various forms of solidarity arguing that a central role of solidarity is to strengthen the counter power of those resisting domination and oppression The Poverty of Capitalism John Hilary, 2013-10-09 Capitalist growth is widely heralded as the only answer to the crisis still sweeping the global economy Yet the era of corporate globalisation has been defined by unprecedented levels of inequality and environmental degradation A return to capitalist growth threatens to exacerbate these problems not solve them In *The Poverty of Capitalism* John Hilary reveals the true face of transnational capital in its insatiable drive for expansion and accumulation He exposes the myth of corporate social responsibility CSR and highlights key areas of conflict over natural resources labour rights and food sovereignty Hilary also describes the growing popular resistance to corporate power as well as the new social movements seeking to develop alternatives to capitalism itself This book will be essential reading for all those concerned with global justice human rights and equity in the world order

Social Mobilization, Global Capitalism and Struggles over Food Renata Motta, 2016-04-28 This book explores the transformation of Brazil and Argentina into two of the world's largest producers of genetically modified GM crops Systematically comparing their stories in order to explain their paths differences ruptures and changes the author reveals that the emergence of the two nations as leading producers of GM crops cannot be explained by technological superiority of biotechnology rather their trajectories are the results of political struggles surrounding agrarian development in which social movements and the rural poor contested the advancement of biotechnologically based agrarian models but have been silenced ignored or demobilized by a network of actors in favour of GM crops Based on rich interview and media material collected amongst activists the author highlights the importance of political struggles over GM crops not only to debates on agrarian futures and food security but also as illustrations of the challenges faced by contemporary democracies An international comparative study this book raises the question of how social mobilization and rights claims can counter the systemic imperatives of global capitalism and political interests at a time when regional governments are reliant on commodity booms whilst globally governments are obliged to introduce programmes of austerity As such it will appeal to scholars of sociology political science and geography with interests in social movements development globalization inequality and political economy **Social and Solidarity Economy** Peter Utting, 2015-04-09 As economic crises growing inequality and climate change prompt a global debate on the meaning and trajectory of development increasing attention is focusing on social and solidarity economy as a distinctive approach to sustainable and rights based development While we are beginning to understand what social and solidarity economy is what it promises and how it differs from business as usual we know far

less about whether it can really move beyond its fringe status in many countries and regions Under what conditions can social and solidarity economy scale up and scale out that is expand in terms of the growth of social and solidarity economy organizations and enterprises or spread horizontally within given territories Bringing together leading researchers blending theoretical and empirical analysis and drawing on experiences and case studies from multiple countries and regions this volume addresses these questions In so doing it aims to inform a broad constituency of development actors including scholars practitioners activists and policy makers
