The Nineteenth-Century Child and Consumer Culture Dennis Denisoff, 2016-12-05. During the rise of consumer culture in the nineteenth century, children and childhood were called on to fulfill a range of important roles. In addition to being consumers themselves, the young functioned as both goods to be used and consumed by adults and as proof that middle class materialist ventures were assisting in the formation of a more ethical society. Children also provided necessary labor and raw material for industry. This diverse collection addresses the roles assigned to children in the context of nineteenth century consumer culture at the same time that it remains steadfast in recognizing that the young did not simply exist within adult articulated cultural contexts but were agents in their formation. Topics include toys and middle class childhood, boyhood and toy theater, child performers on the Victorian stage, gender, sexuality and consumerism, imperialism in adventure fiction, the idealization of childhood as a form of adult entertainment and self flattery, the commercialization of orphans and the economics behind formulations of child poverty. Together the essays demonstrate the rising investment both children and adults made in commodities as sources of identity and human worth.
