Assessment for Social Justice Jan McArthur, 2018-03-22 Assessment for Social Justice takes the established idea of assessment for learning and extends it to consider how assessment contributes to social justice within and through higher education Jan McArthur invites the reader to rethink familiar positions on assessment and fairness and seeks to explore the full complexity of a critical theory inspired notion of social justice She positions her work in contrast to more procedural approaches to social justice such as John Rawls s influential theorisation of social justice In contrast McArthur draws on the work of third generation critical theorist Axel Honneth and takes inspiration from Honneth s three realms of mutual recognition in order to reconsider the nature of assessment relationships and practices A further theoretical strand is introduced in the form of social practice theory and particularly the work of Theodore Shatzki McArthur provides a theoretically rigorous understanding of assessment as a social practice and as a vehicle both for and against social justice Together with critical theory this work enables a realizable vision of an alternative approach to assessment in higher education where the underlying aim is greater social justice McArthur argues that students must be nurtured to recognise the social contribution that they can make as a result of engaging with knowledge in higher education rather than defining their achievements in terms of a mark grade or degree classification

EBOOK: COMPETENCE-BASED ASSESSMENT Alison Wolf, 1995-01-16 Competence based assessment is the cornerstone of the UK Government's reforms of vocational training and of non academic full time education post 16 Australia has adopted similar policies and there is considerable interest in the notion of competence in both Europe and North America Alison Wolf describes the main characteristics of the competence based approach as it has emerged in the UK and traces its origins in American experimental programmes of the 1970s The arguments for the approach are discussed in detail Many of these arguments derive from the demonstrable limitations of more conventional assessment especially in predicting work performance She then analyses the theoretical assumptions which competence based assessment shares with the criterion referenced movement as a whole distinguishing clearly between those claims which can be sustained and those which cannot She also synthesizes the growing body of evidence on implementation Many lessons have now been learned about whether and how one can establish a workable robust and reliable competence based system It has become evident both that the preconditions for success are often missing and that if they are ignored competence based reforms may have largely negative consequences The final chapter reviews the prospects for competence based awards and offers some conclusions on what is essential to a competence based approach
