Timber Toil And Trouble In The Big Woods:

Timber Ralph Warren Andrews, 1968 **The Golden Spruce** John Vaillant, 2009-03-18 NATIONAL BESTSELLER WINNER OF THE GOVERNOR GENERAL'S LITERARY AWARD FOR NON FICTION WINNER OF THE WRITERS TRUST NON FICTION PRIZE Absolutely spellbinding The New York Times The environmental true crime story of a glorious natural wonder the man who destroyed it and the fascinating troubling context in which this act took place FEATURING A NEW AFTERWORD BY THE AUTHOR On a winter night in 1997 a British Columbia timber scout named Grant Hadwin committed an act of shocking violence in the mythic Queen Charlotte Islands His victim was legendary a unique 300 year old Sitka spruce tree fifty metres tall and covered with luminous golden needles In a bizarre environmental protest Hadwin attacked the tree with a chainsaw Two days later it fell horrifying an entire community Not only was the golden spruce a scientific marvel and a tourist attraction it was sacred to the Haida people and beloved by local loggers Shortly after confessing to the crime Hadwin disappeared under suspicious circumstances and is missing to this day As John Vaillant deftly braids together the strands of this thrilling mystery he brings to life the ancient beauty of the coastal wilderness the historical collision of Europeans and the Haida and the harrowing world of logging the most dangerous land based job in North America **Tree Thieves** Lyndsie Bourgon, 2022-06-21 SHORTLISTED FOR THE COLUMBIA SCHOOL OF JOURNALISM J ANTHONY LUKAS BOOK AWARD LONGLISTED FOR THE 2023 PEN JOHN KENNETH GALBRAITH AWARD FOR NONFICTION FINALIST FOR THE NELLIE BY CHANTICLEER INTERNATIONAL BOOK AWARDS FOR JOURNALISTIC NON FICTION A gripping investigation of the billion dollar timber black market and a fascinating examination of the deep and troubled relationship between people and forests Michelle Nijhuis author of Beloved Beasts There's a strong chance that chair you are sitting on was made from stolen lumber In Tree Thieves Lyndsie Bourgon takes us deep into the underbelly of the illegal timber market As she traces three timber poaching cases she introduces us to tree poachers law enforcement forensic wood specialists the enigmatic residents of former logging communities environmental activists international timber cartels and indigenous communities along the way Old growth trees are invaluable and irreplaceable for both humans and wildlife and are the oldest living things on earth But the morality of tree poaching is not as simple as we might think stealing trees is a form of deeply rooted protest and a side effect of environmental preservation and protection that doesn't include communities that have been uprooted or marginalized when park boundaries are drawn As Bourgon discovers failing to include working class and rural communities in the preservation of these awe inducing ecosystems can lead to catastrophic results Featuring excellent investigative reporting fascinating characters logging history political analysis and cutting edge tree science Tree Thieves takes readers on a thrilling journey into the intrigue crime and incredible complexity sheltered under the forest canopy **The Company Town** John Garner, 1992-10-01 Built by industrialists whose early businesses contributed to the escalation of the Industrial Revolution company towns flourished in countries that embraced capitalism and open market trading In many instances the

company town came to symbolize the wrecking of the environment especially in places associated with extractive industries such as mining and lumber milling Some resident industrialists however took a genuine interest in the welfare of their work forces and in a number of instances hired architects to provide a model environment Overtaken by time these towns were either abandoned or caught up in suburban growth The most thorough going and only international assessment of the company town this collection of essays by specialists and authorities of each region offers a balanced account of architectural and social history and provides a better understanding of the architectural and urban experiences of the early industrial age

West Coast logging, 1840-1910 Mary Shakespeare, Rodney H. Pain, 1977-01-01 Utilizing anecdotal technical and documentary data as well as historical photographs and photographs of logging and associated artifacts curated by the Museum the author of this text offers insights into West Coast logging from the contact period to the demise of the use of steam power in the logging industry Published in English

Ghost industries Irene Curulli, 2018-08-03 What is the role of water in the conversion of former industrial areas How is water used in engaging the public to experience these sites both as physical and cultural places Can ecological design foster the coexistence of industry and environment The book addresses these core questions by examining the impact of the former Oregonian industry 1830 1940 on the Willamette River landscape and discussing how projects of transformation interpret the triangular interplay among industry landscape and water This book is a source of suggestions and ideas for scholars students and professionals in architecture landscape architecture planning and their related fields who want to manage the urban landscapes successfully

Shades of Green Ruth Tittensor, 2016-10-31 This book takes a fresh look at the most disliked tree in Britain and Ireland explaining the reasons it was introduced and why it became ubiquitous in the archipelagos of northwest Europe Sitka spruce has contributed to the Pacific Coast landscapes of North America for over ten millennia For the Tlingit First Nation it is the most important tree in terms of spiritual relationships art and products in daily use such as canoes containers fish traps and sweet cakes Since the late nineteenth century it has also been the most important tree to the timber industry of west coast North America The historical background to the modern use of Sitka spruce is explored The lack of cultural reference may explain negative public response when treeless uplands in the UK and Ireland were afforested with introduced conifer species particularly Sitka spruce following two World Wars The multipurpose forestry of today recognizes that Sitka spruce is the most important tree to the timber industry and to a public which uses its many products but fails to recognize the link between growing trees and bought goods The apparently featureless and wildlife less Sitka spruce plantations in UK uplands are gradually developing recognizable ecological features Sitka spruce has the potential to form temperate rain forests this century as well as to produce much needed goods for society The major contribution of Sitka spruce to landscapes and livelihoods in western North America is by contrast widely accepted But conserving natural old growth forests sustaining the needs of First Nations and producing materials for the modern timber industry will be an intricate task

American Cycle Larry

Beckett,2022-07-01 American Cycle a sequence of long poems inspired by our folklore and past was written over forty seven years Its themes are love local mythology history justice memory accomplishment time The books are extraordinary sustained explosions of authentic American language and energy Each is entirely different from the others in style voice form and narrative content each so rich in imagery and nuance and texture and event and so finely crafted Paul Williams author of Bob Dylan Performing Artist American Cycle holds Spanish words loaned from Old California rough colloquialisms in Paul Bunyan the power of African American vernacular English in John Henry bare oratory in Chief Joseph old west phrases in Wyatt Earp circus ballyhoo in P T Barnum aviation jargon in Amelia Earhart backwoods dialect in Blue Ridge As Walt Whitman says I hear America singing the varied carols *Logging in the Central Sierra* Carolyn Fregulia,2008 The logging industry in the

Central Sierra was essential to the expanding economies of both California and Nevada for well over 150 years During the Gold Rush harvested timber in the foothill region of the Sierra was used for mining activities in the construction of early day communities and as fuel Extensive logging of forestland in the higher elevations came with the advent of hard rock mining which required incredible quantities of timber During the 1860s the Comstock Lode of Nevada put a tremendous demand for lumber on the east slope of the Sierra By the time the Comstock had concluded much of the eastern face was denuded with over one quarter of the prehistoric forest gone Advances in technology further fueled the logging industry during the first half of 20th century The Sierra s logging days are waning now but as this volume shows it once played a vital role in the mountains economy lifestyle and identity

Industry and Subsistency Larry Hasse,2017-07-31 The people of the Camas Valley in Washington State were founded in two socioeconomic streams as they survived the Great Depression of the 1930s and moved into the war years of the 1940s The theoretical foundation of this history asserts the existence of a perpetual socioeconomic process of relationship between two interacting streams of human culture Premodern subsistency whereby persons utilize their immediate material environment to make family livings and the modernizing commercial industrial culture whereby people incrementally move beyond subsistency to a convenient level of commerce manufacture and urban specialization By this understanding throughout the flow of times and places of human society a rise and fall of progress and regress exists Here in this place and time the relationship between the industry of Spokane and the agriculture of Stevens County provided the dynamic This book is intended for academic and general readers alike It includes extensive endnotes identifying the information used in creating this micro history of agriculture and industry in the Inland Pacific Northwest The author hopes the book will be interesting and informative to the descendants of the people who built a life in a swath of hinterland reaching from the city of Spokane to the end of Camas Valley and beyond in Stevens County
