Anatomic variants and classifications of each anomaly are discussed in detail in order to provide a broader perspective of the conditions being dealt with. Clinically relevant measurements and indices are covered to a great extent, equipping the examiner with all the necessary elements to prepare a complete final report. Special attention has been given to the evaluation of post-operative patients who constitute the majority of adult CHD patients today. The book has been prepared in a concise manner, highlighting the most important points in each section. Most of the congenital cardiac anomalies have been dealt with comprehensively from the perspective of echocardiographic assessment. This manual provides all relevant details pertaining to the 2D echocardiographic diagnosis of congenital cardiac anomalies in a point-by-point format, which can come handy while dealing with complex cases, especially the rarer variants. This will be a valuable tool in the armour of every echocardiographer, including cardiologists, intensivists, anaesthetists, neonatologists, trainees, and interns.

Individual's Mechanics, Movement and Kinematics Post-Stroke Yih-Kuen Jan, Veronica Cimolin, 2024-06-12. Disability after stroke is a major burden on society due to its high incidence and prevalence. Among the priorities of rehabilitation programs, stroke rehabilitation aims to regain independence and improve patients' quality of life. Dynamic balance, falls prevention, and upper limb recovery are essential features for the clinical management of hemiparetic patients. To optimize movement recovery after stroke, it is essential to select multilevel outcome measures for interpretation of motor recovery and clinical decision making. In this context, the assessment of movement by means of quantitative movement analysis in hemiparetic post-stroke patients is key to planning rehabilitative intervention. Kinematic analysis facilitates interpreting the extent and mechanisms of motor restoration, and it has been increasingly applied in neurological research.
