Disorders Yingqun Huang, Romano Regazzi, William Cho, 2015-07-21 Long noncoding RNAs lncRNAs are a new class of
 transcripts that are in general longer than 200 nucleotides and that have no protein coding potential The vast majority of
 vertebrate genomes encode diverse and complex lncRNAs that play regulatory roles at almost every step of gene expression
 Recently increasing evidence has implicated lncRNAs in the pathogenesis of various human diseases The purpose of the
 Research Topic Emerging roles of long noncoding RNAs in neurological diseases and metabolic disorders is to bring together
 leading researchers in the field who through contributing to an organized and comprehensive collection of peer reviewed
 articles provide a broad perspective on the latest advances in the field A number of interesting and cutting edge areas will be
 covered as below but this list is not exclusive The methodologies and technologies of identifying and studying lncRNAs
 lncRNAs in gene specific transcription lncRNAs in epigenetic regulation lncRNAs in post transcriptional regulation
