Transcultural Cities Jeffrey Hou, 2013 *Transcultural Cities* collects case studies of intercultural exchange and the urban transformations that have accompanied it. Jeffrey Hou and a talented team of multidisciplinary scholars argue for a more critical and open view of cities, urban places and placemaking as vehicles for cross cultural understanding. Greening Cities Puay Yok Tan, Chi Yung Jim, 2017-03-29 This book offers an overview of recent scientific and professional literature on urban greening and urban ecology focusing on diverse disciplines such as landscape architecture, geography, urban ecology, urban climatology, biodiversity conservation, urban governance, architecture and urban hydrology. It includes contributions in which academics, public policy experts and practitioners share their considerable knowledge on the multi-faceted aspects of greening cities. The greening of cities has witnessed a global resurgence over the past two decades and has made a significant contribution to urban liveability and sustainability as well as increasing resilience. As urban greening efforts continue to expand, it is useful to promote recent advances in our understanding of various aspects of planning, design and management of urban greenery, but at the same time it is also important to realize that there are important gaps in our knowledge and that further research is needed. The book is organized in three main parts: concepts, functions and forms of urban greening. The first part examines the historical roots of greening cities and how the burgeoning field of urban ecology can contribute useful principles and strategies to guide the planning, design and management of urban greening. The second part shifts the focus to the diverse range of services, the functions provided by urban greening such as those related to urban climate, urban biodiversity, human health and community building. The final part explores conventional, often neglected but important forms of urban greenery such as urban woodlands and urban farms, as well as relatively recent forms of urban greenery like those integrated with buildings and waterways. It offers a ready reference resource for researchers, practitioners and policy makers to grasp the critical issues and trigger further studies and applications in the quest for high performance green cities. *Celebrating Urban Community Life* Melvin Delgado, 2016-01-01 Communal celebrations bring out the best in us, offering a place for people to come together and take a break from the routines of daily life. They are a vital aspect of city life and are increasingly popular as an urban development strategy. *Celebrating Urban Community Life* is a comprehensive guide to understanding and enhancing communal celebrations as a source of community capital. Drawing on case studies from New York, San Francisco and Toronto, Melvin Delgado discusses the many ways in which fairs, festivals and parades can enhance communal life. Providing a framework for social scientists, urban planners and social workers to analyse and foster celebrations that benefit urban populations, the book is a valuable resource for those with an interest in this growing area of academic and practical interest. **Intercultural Urbanism** Dean Saitta, 2020-07-23 Cities today are paradoxical. They are engines of innovation and opportunity, but they are also plagued by significant income inequality and segregation by ethnicity, race and class. These inequalities and segregations are often reinforced by the urban built

environment the planning of space and the design of architecture This condition threatens attainment of wider social and economic prosperity In this innovative new study Dean Saitta explores questions of urban sustainability by taking an intercultural trans historical approach to city planning Saitta uses a largely untapped body of knowledge the archaeology of cities in the ancient world to generate ideas about how public space housing and civic architecture might be better designed to promote inclusion and community while also making our cities more environmentally sustainable By integrating this knowledge with knowledge generated by evolutionary studies and urban ethnography including a detailed look at Denver Colorado one of America s most desirable and fastest growing destination cities but one that is also experiencing significant spatial segregation and gentrification Saitta s book offers an invaluable new perspective for urban studies scholars and urban planning professionals

Making Home(s) in Displacement critically rethinks the relationship between home and displacement from a spatial material and architectural perspective Recent scholarship in the social sciences has investigated how migrants and refugees create and reproduce home under new conditions thereby unpacking the seemingly contradictory positions of making a home and overcoming its loss Yet making home(s) in displacement is also a spatial practice one which intrinsically relates to the fabrication of the built environment worldwide Conceptually the book is divided along four spatial sites referred to as camp shelter city and house which are approached with a multitude of perspectives ranging from urban planning and architecture to anthropology geography philosophy gender studies and urban history all with a common focus on space and spatiality By

articulating everyday homemaking experiences of migrants and refugees as spatial practices in a variety of geopolitical and historical contexts this edited volume adds a novel perspective to the existing interdisciplinary scholarship at the intersection of home and displacement It equally intends to broaden the canon of architectural histories and theories by including migrants and refugees spatial agencies and place making practices to its annals By highlighting the political in the spatial and vice versa this volume sets out to decentralise and decolonise current definitions of home and displacement striving for a more pluralistic outlook on the idea of home
