

Section 1: The Development of Constitutional Democracy.

Lesson 1

1. How did thinking about the purpose and role of government change during the Age of Enlightenment (1650-1800)? What new ideas about government emerged during this time period?
It gave us government by consent, representative, democracy, and constitutionalism. Beliefs of individualism, equality, liberty, rights of property, and freedom of religion.

Lesson 1.1

2. What are natural rights?
The right to life, liberty and property, believed to be given by God. No government may take.
3. What did English political scholar John Locke mean in *Two Treatises of Government* (1689) when he argued that individuals each have a 'natural right' to life, liberty, and property?
Natural rights refer to the fact that we are inherent to our existence, or part of us. It means we are free to exercise them without others permission.
4. What is the state of nature?
A theory on how people might have lived before societies came into existence.
5. What did French philosopher Charles de Montesquieu recommend in *The Spirit of the Laws* (1748) regarding the division of political power in society?
He wanted separation of powers, many of the judicial, executive, and legislative. They each serve as a check on the power of the other, this limits the harm that a singular branch might do.

Lesson 2.1

6. What is the social contract?
A powerful, foundational agreement between people and their government, in which citizens consent to be covered so long as the government protects their natural rights.

Lesson 2.2

7. Thomas Hobbes and John Locke had very different views on the "social contract" (i.e., the relationship between government and the people). How did their views differ on natural rights and the role of government?

	What fundamental natural right(s) did the people have?	The primary purpose of government in the social contract
Thomas Hobbes	A war against all	Physical security; each very real threat to each other.

Contours of African American Politics Georgia A. Persons, 2017-07-05 *Contours of African American Politics* chronicles the systematic study of African American politics and its subsequent recognition as an established field of scholarly inquiry African American politics emanates from the demands of the prolonged struggle for black liberation and empowerment Hence the study of African American politics has sought to track codify and analyse the struggle that has been mounted and to understand the historic and changing political status of African Americans within American society This two volume set presents a selection of scholarship on African American politics as it appeared in *The National Political Science Review* from its initial launch in 1989 to the spring of 2009 Represented are contributions from some of the leading scholars of African American politics who have helped to establish and sustain the field The volumes are organised around themes that derive from the unfolding real life drama of African American politics and its subsequent scholarly treatment The result is a window into the political efforts that meld the historically disparate strands of black political expressions into a reconstructed and strategically nimble electoral based mass mobilisation necessary for optimising the impact of the African American vote Sections in the volumes also chronicle the evolution of the National Conference of Black Political Scientists as a professional organisation The two volumes illuminate a pivotal epoch in black political empowerment and provide a context for the future of black politics

Lilie, 1984-12-01 Politicians and political analysts continue to use a single liberal conservative dimension to analyze the ideological views of the American people but that approach is increasingly inadequate Professors Maddox and Lilie have gone beyond the liberal conservative continuum By separating questions of economic policy from issues involving civil liberties they find four basic ideological groups liberals conservatives libertarians and populists This book goes a long way toward explaining such phenomena as ticket splitting the impact of the baby boom generation and the internal conflicts both major parties will face over the next few years **What is Political Sociology?** Elisabeth S. Jones, 2016-02-26 Paid earned and social media are all crucial elements of modern electioneering yet there is a scarcity of supplementary texts for campaigns and election courses that cover all types of media Equally media and politics courses cover election related topics yet there are few books that cover these subjects comprehensively This brief and accessible book bridges the gap by discussing media in the context of U S elections David A Jones divides the book into two parts with the first analyzing the wide array of media outlets citizens use to inform themselves during elections Jones covers traditional mainstream news media and opinion entertainment based media as well as new media outlets such as talk shows blogs and late night comedy programs The second half of the book assesses how campaigns and candidates have adapted to the changing media environment These chapters focus on earned media strategies paid media strategies and social media strategies Written in a concise and accessible style while including recent scholarly research the book will appeal to students

with its combination of academic rigor and readability U S Media and Elections in Flux will be a useful supplementary textbook for courses on campaigns and elections media and politics and American introductory politics **American Monthly Review of Reviews** Albert Shaw,1929 **Resources in Education** ,1997 American Monthly Review of Reviews ,1897 **Books and Pamphlets, Including Serials and Contributions to Periodicals** Library of Congress.
