Transnational Communities Shaping Global Economic Governance:

Transnational Communities Marie-Laure Djelic, Sigrid Quack, 2012-06-07 Transnational communities are social groups that emerge from mutual interaction across national boundaries oriented around a common project or imagined identity This common project or identity is constructed and sustained through the active engagement and involvement of at least some of its members Such communities can overlap in different ways with formal organizations but in principle they do not need formal organization to be sustained This book explores the role of transnational communities in relation to the governance of business and economic activity It does so by focusing on a wide range of empirical terrains including discussions of the Laleli market in Istanbul the institutionalization of private equity in Japan the transnational movement for open content licenses and the mobilization around environmental certification These studies show that transnational communities can align the cognitive and normative orientations of their members over time and thereby influence emergent transnational governance arrangements

Protest, Movements, and Dissent in the Social Sciences Giovanni Travaglino, 2017-10-02 Drawing on a wide range of social science disciplines and approaches each chapter in this book offers a comprehensive analysis of social protest political dissent and collective action The distinguished scholars contributing to the book discuss some of the key theoretical and methodological issues in social protest research and analyse recent instances of collective dissent around the globe ranging

from the 15M movement in Spain to the 2011 Salford riots in the UK to Pro Palestinian activism in Jerusalem The result of these contributions is a sophisticated and multifaceted collection that enriches our understanding of why when and how groups of people decide to act collectively in order to pursue political change The book is a timely testament to the vitality of the field This book was originally published as a special issue of Contemporary Social Science Engineering Rules JoAnne Yates, Craig N. Murphy, 2021-03-30 The first global history of voluntary consensus standard setting Finalist Hagley Prize in Business History The Hagley Museum and Library The Business History Conference Private voluntary standards shape almost everything we use from screw threads to shipping containers to e readers They have been critical to every major change in the world economy for more than a century including the rise of global manufacturing and the ubiquity of the internet In Engineering Rules JoAnne Yates and Craig N Murphy trace the standard setting system s evolution through time revealing a process with an astonishingly pervasive if rarely noticed impact on all of our lives This type of standard setting was established in the 1880s when engineers aimed to prove their status as professionals by creating useful standards that would be widely adopted by manufacturers while satisfying corporate customers Yates and Murphy explain how these engineers processes provided a timely way to set desirable standards that would have taken much longer to emerge from the market and that governments were rarely willing to set By the 1920s the standardizers began to think of themselves as critical to global prosperity and world peace After World War II standardizers transcended Cold War divisions to create standards that made the global economy possible Finally Yates and Murphy reveal how since 1990 a new generation of standardizers has focused on supporting the internet and web while applying the same standard setting process to regulate the potential social and environmental harms of the increasingly global economy Drawing on archival materials from three continents Yates and Murphy describe the positive ideals that sparked the standardization movement the ways its leaders tried to realize those ideals and the challenges the movement faces today Engineering Rules is a riveting global history of the people processes and organizations that created and maintain this nearly invisible infrastructure of today s economy which is just as important as the state or the global market The Politics of Blood Anne-Maree Farrell, 2012-05-24 How best to manage risk involving multi valued human biological materials is the overarching theme of this book which draws on the sourcing and supply of blood as a case study Blood has ethical social scientific and commercial value This multi valuing process presents challenges in terms of managing risk therefore making it ultimately a matter for political responsibility This is highlighted through an examination of the circumstances that led to HIV blood contamination episodes in the US England and France as well as their consequences The roles of scientific expertise and innovation in managing risks to the blood system are also analysed as is the increased use of precautionary and legal strategies in the post HIV blood contamination era Finally consideration is given to a range of policy and legal strategies that should underpin effective risk governance involving multi valued human biological materials Knowledge and Policy Change Henrik Lindberg, 2013-02-20 Knowledge

and learning play important roles in policy change in advanced societies and political processes cannot be properly understood if you neglect their significance To understand how learning takes place and what role knowledge plays in the policy process we need to have theoretical and methodological tools to analyse these features The conceptual framework for this volume Knowledge and Policy Change focuses on issues such as belief systems paradigmatic and pragmatic policy change and the role of advocacy coalitions within policy subsystems No less important is the role various forms of knowledge can and do play in the policy formation process The book is structured around three main themes Theories of the policy process and the role of knowledge Reform and restructuring of welfare states Policy transfer diffusion and implementation processes The chapters often have an approach that emphasizes the role of ideas and knowledge in the policy process and give new perspectives on how policy outcomes are affected Many of the chapters deal with policy changes and reform in either the mature welfare states or policy diffusion and transfer in transition economies in East and Central Europe The contributing authors are academic scholars in economics economic history political science and sociology from a variety of countries in Europe and the US

Lee, 2015 In Do It Yourself Democracy sociologist Caroline W Lee examines how participatory innovations have reshaped American civic life over the past two decades Lee looks at the public engagement industry that emerged to serve government corporate and nonprofit clients seeking to gain a handle on the increasingly noisy demands of their constituents and stakeholders New technologies and deliberative practices have democratized the ways in

which organizations operate but Lee argues that they have also been marketed and sold as tools to facilitate cost cutting profitability and other management goals and that public deliberation has burdened everyday people with new responsibilities without delivering on its promises of empowerment

Anthony Giannoumis, 2018-04-19 Technology has attracted an increasing level of attention within studies of disability and disability rights Many researchers and advocates have maintained skepticism towards technology out of the fear that technology becomes another way to fix impairments These skeptical views however contrast with a more positive approach towards the role that technology can play in eliminating barriers to social participation Legal scholarship has started to focus on accessibility and accessible technology and in conjunction with the recently adopted United Nations Convention on the Rights of Persons with Disabilities has put a great emphasis on accessibility highlighting the role that accessible technology plays in the promotion and protection of the rights of people with disabilities Against this background this book gathers together different contributions that focus on enhancing the production marketing and use of accessible technology Building upon previous academic studies and in light of the UNCRPD accessible technology is considered a tool to increase autonomy and participation Overall this book attempts to show through a multifaceted and interdisciplinary analysis that different regulatory approaches might enhance accessible technology and its availability This title was previously published as a special issue of the International Review of Law Computers Technology

Transnationalism, Diaspora and Migrants from the former Yugoslavia in Britain Gayle Munro, 2016-09-13 The geo political area of what once constituted Yugoslavia has been a region of significant migration since the 1960s More
