Transnational Protests And The Media Global Crises And The Media:

Transnational Protests and the Media Simon Cottle, Libby Lester, 2011 In what ways can mediated transnational protests express however emergently or imperfectly global civil society and global citizenship How in an increasingly fragmented and multilayered communications environment can they contribute to a global public sphere This book explores these and other major questions examining protests and their transactions within and through today's complex circuits of communications and media worldwide With contributions from leading theorists and researchers this cutting edge collection discusses protests focusing on war and peace economy and trade ecology and climate change as well as political struggles for civil and human rights including the Arab uprisings At its core is a desire to better understand activists innovative uses of media and communications within a rapidly changing media environment and how this is altering relations of communication power around the globe

Routledge Handbook of Media, Conflict and Security Piers Robinson, Philip Seib, Romy Frohlich, 2016-11-10 This Handbook links the growing body of media and conflict research with the field of security studies The academic sub field of media and conflict has developed and expanded greatly over the past two decades Operating across a diverse range of academic disciplines academics are studying the impact the media has on governments pursuing war responses to humanitarian crises and violent political struggles and the role of the media as a facilitator of and a threat to both peace building and conflict prevention This handbook seeks to consolidate existing knowledge by linking the body of conflict and media studies with work in security studies The handbook is arranged into five parts Theory and Principles Media the State and War Media and Human Security Media and Policymaking within the Security State New Issues in Security and Conflict and Future Directions For scholars of security studies this handbook will provide a key point of reference for state of the art scholarship concerning the media security nexus for scholars of communication and media studies the handbook will provide a comprehensive mapping of the media conflict field

The Routledge Handbook of Environment and Communication Anders Hansen, Robert Cox, 2015-03-05 This Handbook provides a comprehensive statement and reference point for theory research and practice with regard to environment and communication and it does this from a perspective which is both international and multi disciplinary in scope Offering comprehensive critical reviews of the history and state of the art of research into the key dimensions of environmental communication the chapters of this handbook together demonstrate the strengths of multi disciplinary and cross disciplinary approaches to understanding the centrality of communication to how the environment is constructed and indeed contested socially politically and culturally Organised in five thematic sections The Routledge Handbook of Environment and Communication includes contributions from internationally recognised leaders in the field The first section looks at the history and development of the discipline from a range of theoretical perspectives Section two considers the sources communicators and media professionals involved in producing environmental communication Section three examines research on news entertainment media and cultural

representations of the environment The fourth section looks at the social and political implications of environmental communication with the final section discussing likely future trajectories for the field The first reference Handbook to offer a state of the art comprehensive overview of the emerging field of environmental communication research this authoritative text is a must for scholars of environmental communication across a range of disciplines including environmental studies media and communication studies cultural studies and related disciplines *Global Crisis Reporting* Cottle, Simon, 2008-11-01 From climate change to the global war on terror from forced migration to humanitarian disasters these are just some of the global crises addressed in this accessible ground breaking book For the first time the author examines how why and to what extent these are diverse threats to humanity conveyed in today s news media The ^AOxford Handbook of Cultural Sociology Jeffrey C. Alexander, Ronald Jacobs, Philip Smith, 2012-01-26 A collection of essays on various topics from the perspective of cultural sociology based on the premise that ideas and beliefs retain autonomy from the social structures to which they refer and illuminate **Insights on Peace and Conflict Reporting** Kristin Skare Orgeret, 2021-07-26 As the second book in the Routledge Journalism Insights series this edited collection explores the possibilities and challenges involved in contemporary reporting of peace and conflict Featuring 16 expert contributing authors the collection maps the field of peace and conflict reporting in a digital world in a context where the financial prospects of the news industry are challenged and professional authority credibility and autonomy are decaying The contributors ranging from prominent scholars to the Head of Newsgathering at the BBC discuss a diverse range of key case studies including the role of Bellingcat in conflict journalism war and peace journalism in Bangladesh visual storytelling in conflict zones and rampant cyber misogyny confronting women journalists in Finland India the Philippines and South Africa Bringing together theory and practice the collection offers an in depth examination of the changes taking place in the working practices of journalists as ongoing strategic assaults against them increase *Insights on Peace and Conflict Reporting* is a powerful resource for students and academics in the fields of global journalism foreign news reporting conflict reporting globalisation media and international communication **Reporting Dangerously** Simon Cottle, Richard Sambrook, Nick Mosdell, 2016-05-16 More journalists are being killed attacked and intimidated than at any time in history *Reporting Dangerously* Journalist Killings Intimidation and Security examines the statistics and looks at the trends in journalist killings and intimidation around the world It identifies what factors have led to this rise and positions these in historical and global contexts This important study also provides case studies and first hand accounts from journalists working in some of the most dangerous places in the world today and seeks to understand the different pressures they must confront It also examines industry and political responses to these trends and pressures as well as the latest international initiatives aimed at challenging cultures of impunity and keeping journalists safe Throughout the authors argue that journalism contributes a vital if often neglected role in the formation and conduct of civil societies This is why reporting from uncivil places matters

and this is why journalists are often positioned in harm's way. The responsibility to report in a globalizing world of crises and human insecurity and the responsibility to try and keep journalists safe while they do so, it is argued, belongs to us all.

Routledge Handbook of Humanitarian Communication Lilie Chouliaraki, Anne Vestergaard, 2021-09-30. The Routledge Handbook of Humanitarian Communication is an authoritative and comprehensive guide to research in the academic sub-field of humanitarian communication. It is broadly focused on communication that presents human vulnerability as a cause for public concern and encompasses communication with respect to humanitarian aid and development as well as human rights and humanitarian wars. Recent years have seen the expansion of critical scholarship on humanitarian communication across a range of academic fields, sharing recognition of the centrality of media and communications to our understanding of humanitarianism as an agent of transnational power, global governance and cosmopolitan solidarity. The Handbook brings into dialogue these diverse fields, their theoretical frameworks and methodological approaches as well as the public debates that lie at the heart of the contemporary politics of humanitarianism. It consolidates existing knowledge and maps out this emerging field as an important site of interdisciplinary knowledge production on media communication and humanitarianism. As such, the Handbook is not simply a collection of texts sharing a similar theme. It is a coherent intellectual contribution which systematizes current critical scholarship in terms of Domains, Methods and Issues, and sets an agenda of emerging and evolving research priorities in the field. Consisting of 26 chapters written by international scholars who have contributed to laying the foundation of the field, this volume provides an essential guide to the key ideas, issues, concepts and debates of humanitarian communication. [Towards Rethinking Politics, Policy and Polity in the Anthropocene](#)

Hans Günter Brauch, 2025-02-24. Humankind faces two anthropogenic threats to its survival that are closely linked. The first is the end of the Holocene and the start of the Anthropocene, which was marked by the test of a nuclear bomb on 16 July 1945. In the prevailing peace and security narrative, nuclear weapons and the other country bloc or alliance pose a perceived threat to humankind's survival. In the Anthropocene narrative, we are the threat through our way of life and the burning of fossil fuels. The start of the Anthropocene coincides with a change in the international order with the setting up of the UN and the Bretton Woods Institutions. Three stages of this order are distinguished: the Cold War bipolarity, the post-Cold War era unipolarity and the end of the rule-based global liberal order, multipolarity on 24 February 2022. In this book, ten multidisciplinary perspectives discuss complexity, Anthropocene geopolitics, peace and security discourses and the debate on the Anthropocene, planetary boundaries, complex crises and integrative geography in the Anthropocene, governance and politics and the Patriacene and gender. Both existential threats for humankind are illustrated by cover photos of the first nuclear weapons test on 16 July 1945 and by Category 5 Hurricane Otis, an extreme weather event impacting on Acapulco in Mexico on 25 October 2023. The Anthropocene as a new epoch of Earth history coincides in 1945 with a change in the international order. In the security and peace narrative, the other and nuclear weapons pose an existential threat in the

Anthropocene narrative This dual existential change requires a rethinking of politics policy and polity In the social sciences the Anthropocene is being discussed from multidisciplinary perspectives geography political science and peace security and gender studies This is an open access publication **Media Power and Global Television News** Saba Bebawi,2016-01-05 The Middle East has been a particular focus of global crisis reporting Yet international coverage of these conflicts has historically been presented through a Western perspective The absence of Arab voices in the global public sphere has created a discursive gap between the Middle East and the rest of the world The arrival of Al Jazeera English might therefore be regarded as an attempt to bridge this gap by broadcasting discourses from and about the Arab world Using a framing analysis of selected news reports by Al Jazeera English before and after the so called Arab Spring protests this book considers Al Jazeera English s position in the global news environment and identifies the extent to which it addresses this gap between the Arab and global spheres **Digital Media and the Greek Crisis** Ioanna Ferra,2019-11-08 This book concentrates on the parallel evolution of debt crisis and digital communications in Greece By examining four different online and social media platforms it uncovers the impact of digital media on the contentious politics of crisis as well as the impact of the political economic sphere on the formation of the Greek digital mediascape Climate Change and the Media Tammy Boyce,Justin Lewis,2009 It is now more than a quarter of a century since the Intergovernmental Panel on Climate Change published their first comprehensive report on the dangers posed by anthropogenic global warming Over the last twenty five years the weight of evidence about the causes and consequences of climate change has become compelling The solutions are fairly simple we must switch to more sustainable and efficient forms of energy production And yet they remain elusive globally we produce significantly more greenhouse gases now than we did back in 1990 The sad truth is that this inaction has made climate change inevitable the only question that remains is whether we can prevent it spiraling out of control How do we explain this colossal global failure The problem is political rather than scientific we know the risks and we know how to address them but we lack the political will to do so The media are pivotal in this equation they have the power to set the public and the political agenda Climate Change and the Media Volume 2 gathers contributions from a range of international scholars to explore the media s role in our understanding of the problem and our willingness to take action Combined these chapters explain how and why media coverage has to date fallen short in communicating both the science and the politics of climate change They also offer guidance about how the media might shift from being the problem to becoming part of the solution Publisher s website **Citizen Witnessing** Stuart Allan,2013-04-03 What role can the ordinary citizen perform in news reporting This question goes to the heart of current debates about citizen journalism one of the most challenging issues confronting the news media today In this timely and provocative book Stuart Allan introduces the key concept of citizen witnessing in order to rethink familiar assumptions underlying traditional distinctions between the amateur and the professional journalist Particular attention is focused on the spontaneous actions of ordinary people caught up in crisis

events transpiring around them who feel compelled to participate in the making of news In bearing witness to what they see they engage in unique forms of journalistic activity generating firsthand reportage eyewitness accounts video footage digital photographs Tweets blog posts frequently making a vital contribution to news coverage Drawing on a wide range of examples to illustrate his argument Allan considers citizen witnessing as a public service showing how it can help to reinvigorate journalism s responsibilities within democratic cultures This book is required reading for all students of journalism digital media and society Political Communication in Times of Crisis Oscar G. Luengo, 2016-02-15 During the first years of the 21th century we have witnessed many events in our societies some of them without precedent at all in our recent history which have involved irreversible changes The attacks to the Twin Towers in New York City the resulting sequence of wars in the Middle East and the international financial collapse are very good examples of these happenings All these developments of international consequences have led to a new dimension of political communication and have reoriented some of its traditional meanings after a very clear dynamic has irrupted in our lives the crisis Many new dynamics have introduced significant changes and altered the nature of international relations the processes of policy making the governmental performances the citizen s demands the electoral campaigns and the geographical tensions among other socio political developments The revolutionary wave of demonstrations protests riots and civil wars in the Arab world starting in 2010 Arab spring the waves of human asylum seekers as a direct consequence of this reality the so called colour revolutions that overthrew governments in Georgia Ukraine Kyrgyzstan and Lebanon the territorial conflict between Russia and Ukraine the intensification of the anti globalisation movements the outraged protests around the world the conflict between Israel and Palestine one of the hardest and longest conflicts to date that has been reactivated over and over the terrorist attacks in Madrid London Boston and Paris or the recent global threat created by the Islamic State of Iraq and the Levant ISIS all this leads societies to an unprecedented present in the realm of political communication Some of those topics are treated in this volume approaching the main questions with the googles of political communication since most of these developments have a very visible communicational dimension This book comprises several chapters divided into five different sections These stimulating pieces of research were presented by 30 international contributors from almost 10 different nationalities

Political Communication Aeron Davis, 2023-11-28 We are living in a period of great uncertainty The rise of extreme populists economic shocks and rising international tensions is not only causing turmoil but is also a sign that many long predicted tipping points in media and politics have now been reached Such changes have worrying implications for democracies everywhere This second edition of Political Communication bridges old and new to map the political and cultural shifts and analyse what they mean for our ageing democracies With new sections and revisions to all chapters the book continues both to introduce and challenge the established literature It revisits key questions such as Why are polarized electorates no longer prepared to support established political parties Why are large parts of the legacy media either dying

or dismissed as fake news And why do some democratic leaders look more like dictators In this fully updated edition there is greater focus on digital developments and it is enriched with new global comparisons and useful ancillary material Political Communication An Introduction for Crisis Times will appeal to advanced students and scholars of political communication as well as anyone trying to understand the precarious state of today's media and political landscape **Reconfiguring**

European States in Crisis Desmond S. King, Patrick Le Galès, 2017 Reconfiguring European States in Crisis offers a groundbreaking analysis by some of Europe's leading political scientists examining how the European national state and the European Union state have dealt with two sorts of changes in the last two decades Firstly the volume analyses the growth of performance measurement in government the rise of new sorts of policy delivery agencies the devolution of power to regions and cities and the spread of neoliberal ideas in economic policy The volume demonstrates how the rise of non state controlled organizations and norms combine with Europeanization to reconfigure European states Secondly the volume focuses on how the current crises in fiscal policy Brexit security and terrorism and migration through a borderless European Union have had dramatic effects on European states and will continue to do so Political Communication Carsten Reinemann, 2014-07-28

Against the background of an enormous expansion and diversification of both political communication itself and scientific research into its structures processes and effects this volume gives an overview of some of the key theories and findings accumulated by political communication research over the last decades In order to do so the volume provides readers with review articles by renowned international authors on various aspects of I the normative regulatory and conceptual foundations of political communication II different situations of political communication e.g. elections referendums social movements media hypes crisis and war III the activities of and part played by political actors IV mass media and journalism V characteristics and typical features of media messages VI the role played by citizens as well as VII various kinds of effects on citizens Each section includes several chapters that address specific issues and research problems in the form of comprehensive overviews articles **Spreading Protest** Donatella della Porta, Alice Mattoni, 2014-08-15 Which elements

do the Arab Spring the Indignados and Occupy Wall Street have in common How do they differ What do they share with social movements of the past This book discusses the recent wave of global mobilisations from an unusual angle explaining what aspects of protests spread from one country to another how this happened and why diffusion occurred in certain contexts but not in others In doing this the book casts light on the more general mechanisms of protest diffusion in contemporary societies explaining how mobilisations travel from one country to another and also from past to present times Bridging different fields of the social sciences and covering a broad range of empirical cases this book develops new theoretical perspectives **Screening Protest** Alexa Robertson, 2018-07-11 Screening Protest brings together a range of

scholarly perspectives on the study of protest mediations on television and in film Arguing that the screen is a fruitful if overlooked analytical focus the book explores how visual narratives of protest wander across borders territorial temporal and

generic Chapters compare coverage of major protests in recent history by global news channels like Al Jazeera English BBC World CNN International and RT They consider how geopolitical agendas newsroom culture and the ubiquity of eyewitness footage shape the narration of events such as the Umbrella Revolution in Hong Kong anti austerity protests in Greece pro EU mobilizations in the Ukraine and clashes in Ferguson A focus on narrative allows authors to compare such news stories with popular cultural depictions of the protester in films and television series such as The Hunger Games Robin Hood and Suffragette Although focussed on the screen the scope of the book is broad given its exploration of images distributed worldwide Written with both scholars and students in mind Screening Protest will interest researchers in political science sociology media and film studies as well as the general reader interested in current affairs

Portugal Since the 2008 Economic Crisis António Costa Pinto, 2023-05-11 Portuguese democracy is now celebrating its 50th anniversary Portugal joined the European Union EU in 1986 but the enduring legacies of the country's transition process from authoritarianism to democracy became apparent during the European sovereign debt crisis when Portugal experienced its third bailout since the institutionalization of democratic government Although the first decade after EU accession was one of slight growth and investment Portugal's economy has in effect been performing poorly since the beginning of the 21st century Among the major changes in Portugal as in much of Southern Europe as a result of the great recession was the emergence of important new actors including populist parties new social movements and the polarization of attitudes toward the EU In some of these areas the phrase with the exception of Portugal was always present This book explores the factors that might explain why this is no longer the case presenting a global overview with an interdisciplinary focus of the processes of economic social and political changes in Portuguese democracy since the 2008 economic crisis The volume is accessible to a broad academic audience with chapters examining economic political social and foreign policy issues for scholars interested in an analysis of Portugal's emergence from the economic crisis
