Schmidt,2007-12-18 What Is Smart There s evidence of so much more than reading writing and arithmetic in every child at least seven distinct intelligences according to the theory of multiple intelligences developed by Harvard s Dr Howard Gardner In Seven Times Smarter veteran educator Laurel Schmidt offers a parent friendly explanation of this theory and of the ways that kids are simply put word smart picture smart music smart body smart logic smart people smart and self smart

These intelligences aren't fixed at birth. They can be nurtured and strengthened meaning that in the right environment kids get smarter. *Seven Times Smarter* an invaluable resource for parents, teachers and caregivers provides the perfect way to create this environment. Unlike other craft or activity books that just fill time and keep kids busy, *Seven Times Smarter* prompts kids aged six to fourteen to work their brains and cultivate new skills using recycled or low cost materials found in every home and enjoy it. It offers an exploration of what it means to be smart, checklists to recognize the seven intelligences in your child, book lists to develop and celebrate all the ways your child is smart and fifty creative constructive activities that are good for kids playing alone or in a group supervised or independently including Memory Tours. If a memory book is too straightforward for your artistic child, try an unbook, a memory box or a calendar. Hanging Gardens Indoors or out, even the smallest garden plot can yield a bumper crop of mathematical, linguistic, scientific and kinesthetic skills. *The Boredom Brigade* Boredom is a springboard for imagination, imaginary structures, identities, occupations and friends are just some of the ways kids develop their inter and intra personal intelligences. *Junk Yard Genius* There's an education in junk, in fact it's easy to turn your broken radio, alarm clock, fan, blow dryer or scale into a project that could fascinate kids for days.
