characterizes global politics that extra edge can matter greatly making monetary rivalry an integral component of geopolitics Today the major example of monetary rivalry is the emerging confrontation between the US dollar and the Chinese renminbi Cohen describes how China has vigorously promoted the international standing of its currency in recent years even at the risk of exacerbating relations with the United States and explains how the outcome could play a major role in shaping the broader geopolitical engagement between the two superpowers **The Six-Party Talks on North Korea** Mi-yeon Hur, 2018-01-03 The book traces the past decade of dynamic interactions among the concerned states involved in the Six Party Talks on North Korean nuclear programs Unlike existing studies which usually dissect incidents of the talks the book provides a comprehensive systemic analysis of the Six Party Talks process from A to Z These new insights into the nuclear drama in the Northeast Asian region will be of value to scholars policy makers and analysts **International Financial Centres after the Global Financial Crisis and Brexit** Youssef Cassis, Dariusz Wójcik, 2018-07-04 This is an open access title available under the terms of a CC BY NC ND 4.0 International licence It is free to read on the Oxford Academic platform and offered as a free PDF download from OUP and selected open access locations As well as marking the tenth anniversary of the collapse of Lehman Brothers and the consequent unleashing of the global financial crisis 2018 is also the year of negotiations on the terms of the UK's exit from the European Union Within a decade the banking world has witnessed two epochal events with potential to redraw the map of international financial centres but how much has this map actually changed since 2008 and how is it likely to change in the near future International Financial Centres after the Global Financial Crisis and Brexit gathers together leading economic historians geographers and other social scientists to focus on the post 2008 developments in key international financial centres It focuses on the shifting hierarchies of New York London Paris Geneva Zurich Frankfurt Singapore Hong Kong Beijing Shanghai and Tokyo to question whether Asian financial centres have taken advantage of the crisis in the West It also examines the medium effects of the crisis the level of regulation and the rise of new technology fintech By exploring these crucial changes it questions whether shifts in the financial industry and the global landscape will render these centres unnecessary for the functioning of the global economy and which cities are likely to emerge as hubs of new financial technology **A New Counterterrorism Strategy** T.
