A typology of questions in Northeast Asia and beyond Andreas Hölzl, 2018-08-29 This study investigates the distribution of linguistic and specifically structural diversity in Northeast Asia (NEA) defined as the region north of the Yellow River and east of the Yenisei. In particular, it analyzes what is called the grammar of questions (GQ), i.e. those aspects of any given language that are specialized for asking questions or regularly combine with these. The bulk of the study is a bottom-up description and comparison of GQs in the languages of NEA. The addition of the phrase "and beyond" to the title of this study serves two purposes. First, languages such as Turkish and Chuvash are included despite the fact that they are spoken outside of NEA since they have ties to or even originated in the region. Second, despite its focus on one area, the typology is intended to be applicable to other languages as well. Therefore, it makes extensive use of data from languages outside of NEA. The restriction to one category is necessary for reasons of space and clarity, and the process of zooming in on one region allows a higher resolution and historical accuracy than is usually the case in linguistic typology. The discussion mentions over 450 languages and dialects from NEA and beyond and gives about 900 glossed examples. The aim is to achieve both a cross-linguistically plausible typology and a maximal resolution of the linguistic diversity of Northeast Asia. **A**

Typology of Verbal Borrowings Jan Wohlgemuth, 2009 Main description The present work is the first in-depth cross-linguistic study on loan verbs and the morphological, syntactic and sociolinguistic aspects of loan verb accommodation. Investigating claims that verbs generally are more difficult to borrow than other parts of speech or that verbs could not be borrowed as verbs and needed a re-verbalization in the borrowing language. **All Things Morphology** Sedigheh

Moradi, Marcia Haag, Janie Rees-Miller, Andrija Petrovic, 2021-08-15 This book provides a view of where the field of morphology has been and where it is today within a particular theoretical framework, gathering up new and representative work in morphology by both eminent and emerging scholars and touching on a very wide range of topics, approaches and theoretical points of view. These seemingly disparate articles have a common touchstone in their focus on a word-based

paradigmatic approach to morphology The chapters in this book elaborate on these basic themes from the further exploration of paradigms to studies involving words stems and affixes to examinations of competition inheritance and defaults to investigations of morphemes to ways that morphology interacts with other parts of the language from phonology to sociolinguistics and applied linguistics The editors and contributors dedicate this volume to Prof Mark Aronoff for his profound influence on the field

Case and Aspect in Slavic Kylie R. Richardson, 2007-06-28 The role of structural case in syntax is arguably one of the most controversial topics in syntactic theory with important implications for semantic theory This book focuses on some of the most puzzling case marking patterns in the Slavic languages and ties these patterns to different types of aspectual phenomena showing that there is after all a pattern in the seeming chaos of case in the Slavic languages Kylie Richardson addresses links between the case marking on objects and the event structure of a verb phrase in Belarusian Russian Ukrainian Czech Slovak Polish and Bosnian Croatian Serbian and also shows that the links between case and aspect in the Slavic languages belong to a much larger pattern found in language in general She also focuses on links between case and grammatical aspect in depictive predicative participle and copular constructions in the East Slavic languages The book will appeal to scholars and advanced students of aspect and to all Slavicists

Relative Constructions in European Non-Standard Varieties Adriano Murelli, 2011-10-27 Cross linguistic studies on relative constructions in European languages are often centred on standard varieties as described in reference grammars This volume breaks with the tradition in that it investigates relative constructions in non standard varieties from a multidisciplinary perspective and addresses a crucial question what does Europe's typological panorama actually look like

Reconstructing Non-Standard Languages Lenore A. Grenoble, Jessica Kantarovich, 2022-12-15 Focusing on language contact involving Russian and the linguistic varieties that emerged from that contact in different social settings this book analyzes issues and methodologies in reconstructing both the linguistic effects of language contact and the social contexts of usage In depth analyses of Odessan Russian a southern Russian contact variety with Yiddish and Ukrainian elements and Russian lexifier pidgins illustrate the reconstruction process which involves making the most of all available documentation particularly literature and stereotypical descriptions Historical sociolinguistics of this kind straddles the fields of historical linguistics sociolinguistics and contact this book brings together the methods and theories of these areas to show how they can result in a rich reconstruction of linguistic and socially conditioned variation We reconstruct the circumstances and social settings that produced this variation and demonstrate how to reconstruct which variants were used by different types of speakers under different circumstances and what kinds of social identities they indexed
