Unavoidable Germans Art Vs Politics And The Consequences:

Unavoidable Germans John Mosher, 1997-04-17 *Unavoidable Germans* describes how 20th century Germany with its high reputation in philosophy the arts and especially music could accept a banal undereducated outsider Hitler as national and cultural leader In exploring German culture the author found three unavoidable Germans in Goethe Wagner and Thomas Mann whom the book examines in detail before bringing the fourth unavoidable personality Hitler himself on the scene to examine how he dealt with German artistic and cultural standard and how the artists and philosophers reacted to him A clear understanding of the collision of German culture and the brutal uncompromising principles of Hitler enables conclusions that can be applied to any nation whose political system is under attack or in a state of deterioration Understanding the events of the German 20th century and of the previous two centuries which laid the groundwork for this the most extreme case imaginable of culture colliding with brutality helps us make more intelligent artistic and political choices for ourselves

Boehm, 1999 *Max Weber and German Politics, 1890-1920* Wolfgang J. Mommsen, 1990-07-25 A major work of German historiography this comprehensive account of Weber's political views and activities reveals that paradoxically Weber was at once an ardent liberal and a determined German nationalist and imperialist Wolfgang J Mommsen shows the important links between these seemingly conflicting positions and provides a critique of Weber's sociology of power and his concept of democratic rule First published in German in 1959 *Max Weber and German Politics* appeared in a revised edition in 1974 and became available in an English translation only in 1984 In writing this work Mommsen drew extensively on Weber's published and unpublished essays newspaper articles memoranda and correspondence **War Is Not Inevitable** Henri Parens, 2014-07-22 In 1932 Einstein asked Freud Is there any way of delivering mankind from the menace of war Freud answered that war is inevitable because humans have an instinct to self destroy a death instinct which we must externalize to survive But nearly four decades of study of aggression reveal that rather than being an inborn drive destructiveness is generated in us by experiences of excessive psychic pain In *War Is Not Inevitable On the Psychology of War and Aggression* Henri Parens argues that the death instinct based model of aggression can neither be proved nor disproved as Freud's answer is untestable By contrast the multi trends theory of aggression is provable and has greater heuristic value than does a death instinct based model of aggression When we look

for causes for war we turn to history as well as national ethnic territorial and or political issues among many others but we also tend to ignore the psychological factors that play a large role Parens discusses such psychological factors that seem to lead large groups into conflict Central among these are the psychodynamics of large group narcissism Interactional conditions stand out hyper narcissistic large groups have in history caused much narcissistic injury to those they believe they are superior to But this is commonly followed by the narcissistically injured group s experiencing high level hostile destructiveness toward their injury perpetrator which in time will compel them to revenge Among groups that have been engaged in serial conflicts wars have followed from this psychodynamic narcissism based cyclicity Parens details some of the psychodynamics that led from World War I to World War II and their respective aftermath and he addresses how major factors that gave rise to these wars must can and have been counteracted In doing so Parens considers strategies by which civilization has and is constructively preventing wars as well as the need for further innovative efforts to achieve that end

World War I Germany Having spent 38 months on the frontline his pictures revealed the brutalities of the conflict and helped establish him as one of Europe's leading modernists Offering substantial new research and presenting numerous primary sources to an English readership for the first time the book examines Dix's war pictures within the broader visual culture of war in order to assess how they functioned alternatively as cutting edge modernist art and transgressive war commemoration Each chapter provides a case study of the first public display of one or more of Dix's war pictures at key exhibitions and explores how their reception was subjected to changing socio-political and cultural conditions as well as divergent attitudes to the lost war It pulls together a number of key approaches and texts contemporary reviews contemporary cultural productions such as novels and cartoons and theoretical and historical approaches from history memory studies and art history Bringing a unique perspective and original scholarship to Dix's war works this book is essential reading for art historians of World War I and the visual culture of Weimar Germany

Art, Culture and International Development

John Clammer, 2014-11-13 Culture is not simply an explanation of last resort but is itself a rich multifaceted and contested concept and set of practices that needs to be expanded appreciated and applied in fresh ways if it is to be both valued in itself and to be of use in practical development This innovative book places culture specifically in the form of the arts back at the centre of debates in development studies by introducing new ways of conceptualizing art in relation to development The book shows how the arts and development are related in very practical ways as means to achieve development goals through visual dramatic filmic and craft inspired ways It advocates not so much culture and development but rather for the development of culture Without a cultural content to economic and social transformation the problems found in much development uprooting of cultures loss of art forms languages and modes of expression and performance may only accelerate Paying attention to the development of the arts as the content of development helps to amend this culturally destructive process Finally the book argues for the value of the arts in attaining sustainable cultures promoting poverty alleviation encouraging self-empowerment stimulating creativity and the social imagination which in turn flow back into wider processes of social transformation Discussion questions at the end of each chapter make this book ideal to help foster further thinking and debate This book is an inspiring read for postgraduate students and researchers in the fields of development studies cultural studies and sociology of development

Fear and Uncertainty in Europe Roberto

Belloni, Vincent Della Sala, Paul Viotti, 2018-08-02 Russia's intervention in the Ukraine Donald Trump's presidency and instability in the Middle East are just a few of the factors that have brought an end to the immediate post Cold War belief that a new international order was emerging one where fear and uncertainty gave way to a thick normative and institutional architecture that diminished the importance of material power This has raised questions about the instruments we use to understand order in Europe and in international relations The chapters in this book aim to assess whether foreign policy actors in Europe understand the international system and behave as realists They ask what drives their behaviour how they construct material capabilities and to what extent they see material power as the means to ensure survival They contribute to a critical assessment of realism as a way to understand both Europe's current predicament and the contemporary international system
